Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
9/24/2026 23:03:17	Eshaan Mishra	Sphinx	Hello, I am currently enrolled at Bennett University, India, and I am trying to verify my student status through AWS Builder Center for the Amazon ML Challenge 2026. The SheerID verification process terminates with the message "We couldn't continue your verification." I believe I am eligible for student verification. Please help me complete or restar	https://drive.google.com/open?id=1T1JrS	
9/24/2026 23:10:42	Srishti Pandey	Dabour paste	Is it mandatory to use AWS services (SageMaker) for model development, or can we use other platforms (Colab/Kaggle) for GPU-based components and bring the pipeline into AWS for final submission?	https://drive.google.com/open?id=1O4VB	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/24/2026 23:17:59	Pavni Manocha	fireflies	I am unable to sign-in in console. The captcha just keeps on refreshing when I submit it again and again.	https://drive.google.com/open?id=1eSL2I	
9/24/2026 23:24:20	Harshita	Neural Ninjas	Hey, since it is said that each member of the team must be from graduating year 2027 and 2028 , my graduating year is 2028 but since if you guys check it from the aws builder profile of mine , there it is not showing verified . I mailed about this thing but there response was that the verification is done by their partner sheer id, i mailed them and the	https://drive.google.com/open?id=13pOlq	
9/24/2026 23:49:11	Akshat Yuvan	Slytherin	Will the time of submission be considered during judging? It is not mentioned in the guidelines, so could you clarify whether it carries any weight compared with the project's quality, completeness, and impact?	https://drive.google.com/open?id=15S6Ih	
9/24/2026 23:52:34	Sushanth C	MatrixGlitch	We had requested the GPU instances for sagemaker and we havent recieved the confirmation for the usage of the required number of instances. as for new accounts there are 0 instances allocated. the requests was sent on 23rd of septembar and its already 24th ending.	https://drive.google.com/open?id=1umxA	
9/24/2026 23:53:29	Pratham Tomar	almostthere	Sheer ID verification is expired - (https://builder.aws.com/community/@pratham99147?tab=badges) - This verification is expired. Please submit a new verification. Can you please help me in verifying my aws.builder.account	https://drive.google.com/open?id=1i8koO	
9/24/2026 23:54:22	Rishikesh Bhatt	AWeSome Coders	Uhm, are we to maintain version history and make final submission in aws sagemaker and ec2 itself ? or is open source allowed ?	https://drive.google.com/open?id=14Rlqg	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/24/2026 23:57:07	Vasanth	SyntaxLab	Since we have our sem exams tomorrow in our college, will there be any issue to start now at 25 sep 12 am then close then again re-start session after attending exams	https://drive.google.com/open?id=1ymtaf	
9/24/2026 23:58:58	Divyam Joshi	TEAM GLXY	I already had built my AWS account earlier and used up my 100 dollars USD credits. How can i use SageMaker which is an AWS service itself or can i train and build model on any other platforms like Kaggle / Colab.	https://drive.google.com/open?id=1QeDq	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:01:10	dhaneshwaran M	Data Drift	completing our solution using sagemaker ai is mandatory	https://drive.google.com/open?id=1iTnJ3	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:04:47	nikhil agrawal	neural ninjas	are we allowed to use open source model for finetuning inference etc. having an Apache License 2.0 or is there some restriction to it	https://drive.google.com/open?id=17WzI	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 0:07:11	Utkarsh Sinha	UPMT	Dataset link is not provided in the problem statement pdf	https://drive.google.com/open?id=1vHhr_	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:08:13	shaun angel	Data before Drama	Is using AWS services mandatory and do we get additional points if we use one	https://drive.google.com/open?id=1nQHJ	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:09:59	Mandadi lakshmi sahithi	Peter Parker	Can we do multiple logins from each person of team for checking our status and problem statement but not for submission	https://drive.google.com/open?id=1QbFz/	
9/25/2026 0:11:22	Harsh	Quadra	dataset download link is not provided also can we use any code editor to build like colab or jupyter notebook or it is mandatory to use sage	https://drive.google.com/open?id=179r2	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:12:50	Malhar Satishkumar	Team Alpha	dataset is mentioned in the problem statement , but is not provided , please provide how to access the same , because external data is explicitly not allowed as per guidelines	https://drive.google.com/open?id=1FyUc	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:13:04	Nitin Rai	Terabyte	Load any accounts unable to say any my credits and all unable to open a sagemaker AI as well something problem with my account please with my account	https://drive.google.com/open?id=1AtrEL	
9/25/2026 0:14:53	Mirdula R	Code & Coffee	We received the problem statement description, but we haven't received the dataset yet. It also seems that there is a phase specifically for the TL (Team Leader) that needs to be completed in proctored mode. Could you please clarify what exactly the TL is expected to do during the proctored phase? Does the TL need to work on the problem statement for 3 days continuously in proctored mode, or is the proctored session only for a specific assessment/task? Also, could you clarify what activities are expected to be completed during this proctored phase?	https://drive.google.com/open?id=13P1rq	
9/25/2026 0:17:36	Gaurav Kumar	AlgoBrains	Dataset is not provided. Please provide the dataset link.	https://drive.google.com/open?id=1CxOE	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:19:43	Pushkar C	StrongHold	Dataset link is not provided	https://drive.google.com/open?id=1RR2f	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:19:58	Yash Sharma	The Overfits	can you please tell me where to find the datasets	https://drive.google.com/open?id=1QwAX	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:21:12	Pradyumna Singh	Binary Brains	im not able to download the dataset, it is not giving any option	https://drive.google.com/open?id=1NonN	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:22:41	khyati singh	alexacode	is this a coding test or a hackathon?	https://drive.google.com/open?id=1XvtP9	It is a 72-hour ML challenge/hackathon: you build an entity-resolution solution and upload predictions to a leaderboard. There is no separate MCQ or coding round.
9/25/2026 0:24:35	K.Jeevan Anand	Brainbyte	The Problem Statement mentions the training and test dataset files, but I am unable to find or access the dataset download link. Could you please clarify where the dataset can be downloaded from and provide the dataset access/download link?	https://drive.google.com/open?id=1qkLnl	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:24:45	Gaurav SK	Sonic	Sir/madam, we aren't able to find the dataset for the problem statement, can you please provide the data set with which we can proceed with building the solution	https://drive.google.com/open?id=1Gp-N	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:25:06	Kaarthi S	TomCat	can you please tell me where to find the datasets	https://drive.google.com/open?id=1RSWj	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:25:12	Riya Jamdade	Epoch	I cannot find the dataset	https://drive.google.com/open?id=1UFIbt	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:25:44	Ved Somesh Lawand	Three-Tier	Not able to find the dataset	https://drive.google.com/open?id=1OXZ2	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:25:46	Mansi Khandekar	Amazonianz	I cannot find the dataset, can someone tell me how to access it?	https://drive.google.com/open?id=1g1aLu	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:26:18	Pranav Pithadia	Caffeine Cult	There is no clarity on whether this challenge is a hackathon or a coding test. Also there is no dataset provided with the PS	https://drive.google.com/open?id=1OSDA	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. It is a 72-hour ML challenge/hackathon: you build an entity-resolution solution and upload predictions to a leaderboard. There is no separate MCQ or coding round.
9/25/2026 0:26:45	pramod sai tarva	BugBusters404	I couldn't find the dataset it was not available to download in the email	https://drive.google.com/open?id=1-ALiM	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:26:57	Soham Sharma	Commit & Conquer	is the leaderboard ordered according to the submission time and date like earlier submission will be placed above in case of tie or same position will be awarded ?	https://drive.google.com/open?id=10dTz_	
9/25/2026 0:28:23	Bhawanand Jha	Team Eigen	Do we have to perform all the ML task in Amazon SageMaker or we can use any other platform like Google collab or jupyter notebook	https://drive.google.com/open?id=1x2IUI	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:28:38	Abhay S N	Predators	is LLM fine-tuning based methods allowed in this challenge ?	https://drive.google.com/open?id=1wxiCj	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 0:31:23	Vishalkanth K S	Team Hackwack	We have got the problem statement, but have not received any dataset to work with. Kindly keep us informed regarding this matter.	https://drive.google.com/open?id=1XRvfz	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:32:57	Krishna Suresh Ransing	3 AM DEVS	If team leader is only allowed to submit solution and see the code how other members will be helping as it is proctored how other group members will help	https://drive.google.com/open?id=1Wr6e	
9/25/2026 0:33:03	Rohan R Nair	4i	Where to find the dataset?	https://drive.google.com/open?id=1PXKf	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:33:27	Anant Jain	Bias Busters	Can we login to the test again after closing the browser tab?	https://drive.google.com/open?id=1KH6V	
9/25/2026 0:33:50	Priya Singh	Alpha	I am unable to find dataset in the problem statement	https://drive.google.com/open?id=1Q33C	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:34:44	Shambhavi Singh	Unsupervised	cant find the dataset	https://drive.google.com/open?id=1WuwY	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:35:03	Rehaan Khan	Codyssey	Where to find the dataset ? And can we use Google Collab as the editor ?	https://drive.google.com/open?id=1eXS4I	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 0:35:58	Abhinash sahoo	THE ODRISCOLLS	How to acces the dataset and i have logged in aws account but its showing it will take 24 hrs to verify the account and the hackathon is of 72 hours	https://drive.google.com/open?id=1TDAe	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:35:59	Biswajit Nayak	Shinigami	I just read the problem statement but there was no information on where to get the dataset for the competition. Can you inform me on how to get all of the data files as dataset isn't available in unstop or any link have been given	https://drive.google.com/open?id=1_AIXl	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:36:10	Shreyash Gaikwad	NOVA	we have the problem statement but link to the data set is not provided	https://drive.google.com/open?id=1eOuR	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:36:59	Gayatri Warty	TechStars	I have uploaded all the necessary documents but I am unable to verify my student status via Sheer ID	https://drive.google.com/open?id=1YAeM	
9/25/2026 0:37:48	Soutrik Das	Local Minima (IIT BBS)	My personal account was suspended due to (I think) a address issue , in the sense my document added shows other address than the one I inputted , thats because my address is currently far from home , ie im at college , so used their address but i guess i shouldnt have done that , how to change that or regain access ?	https://drive.google.com/open?id=1qvdSr	
9/25/2026 0:37:56	Mohan Krishna	backProp	Dataset Where?	https://drive.google.com/open?id=1jaxpT	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:38:27	Shankar C Akashkore	Team Async	Unable to open the problem statement and data set, Which was provided in the email, The link is not opening, I have shared the screenshot. Please check it.	https://drive.google.com/open?id=1OA0U	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:38:48	Suchetana Chowdhury	ctrl + chaya	We wanted to know if pre-trained models can be used since it is mentioned that "Participants are STRICTLY NOT ALLOWED to use external databases, APIs, or services to look up business identities or resolve entities"	https://drive.google.com/open?id=1XuBc	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 0:41:09	Suvranil Mondal	Ultron	where can we access the training datasets?? pls reply asap	https://drive.google.com/open?id=1aB_Ui	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:41:19	Pranav Arvind Thormise	The Omega's	in the email I received with the problem statement pdf , but I cant find any link to dataset or anything extra, so do I will get dataset from your side or create my own	https://drive.google.com/open?id=1MEVy	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:41:22	Anuj S Jain	Sphinx	Where to find the dataset?	https://drive.google.com/open?id=1qhRD	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:42:16	Om Sharma	VyomAI	The data set is not available with the mail and I am unable to sign in.	https://drive.google.com/open?id=1qutCs	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:42:39	Rohanpreet Arora	Innov3	I could not find the dataset. It is neither attached to the Problem Statement PDF nor present in the email.	https://drive.google.com/open?id=1QEvC	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:42:51	Riya Bhardwaj	VisionX	do not received the dataset and do we have to attempt assessment now or after completing the challenge	https://drive.google.com/open?id=1qvUo	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:43:05	Nitin Chauhan	Dead Neurons	I am not able to find the dataset	https://drive.google.com/open?id=1IrfQ	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:43:58	Sagnik Pal	SASScoders	How can we get the dataset ? Where is the link of dataset provided ?	https://drive.google.com/open?id=1BGBr	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:45:18	Pranjal	Runtime Error	from where we have to download data set	https://drive.google.com/open?id=1DiuRc	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.

Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
9/25/2026 0:45:29	Perla Maddhaiah	ML Titans	Hello Amazon ML Challenge Team, I have registered for the Amazon ML Challenge 2026 and would like to start working on the challenge. However, I am unable to find the dataset or the official instructions for accessing/downloading the dataset. Could you please clarify: 1. Where can I access the official challenge dataset? 2. Is the dataset available through the challenge portal, GitHub, or another platform? 3. Are there any specific steps required to obtain or download the dataset? 4. If the dataset has not been released yet, could you please confirm when and where it will be made available? I have attached a screenshot/document showing the information currently available to me, if required. Thank you.	https://drive.google.com/open?id=1S1LM	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:46:30	Udishi Jairath	House of Innovators	we are not able to access any kind of dataset we can only find problem statement	https://drive.google.com/open?id=1vINW	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:47:04	SRI SELVA MIRUTHULA \	Zynox	As we were told that we would get the problem statement and the dataset on day 1, I couldn't find the dataset or any attachments regarding that. Please clarify when the actual dataset would be provided.	https://drive.google.com/open?id=1dWD-	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:47:20	Shrikant Kishor Lunge	Team-X	How can we access dataset?	https://drive.google.com/open?id=1QZ1Z	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:50:25	Ganesan P V	Thadaladi	Even after uploading the files .. I am not able to submit the files and view the evaluation	https://drive.google.com/open?id=1a-1rX	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:50:50	Rakoti Sai Gayathri	ctrl+code	to get access account id i am trying to login to AWS management console but the captcha is showing incorrect entry even when the entered captcha is correct.	https://drive.google.com/open?id=1cslRC	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:53:39	MIDDE PREM KUMAR	ML Mavericks	Hello Team, I have registered for the Amazon ML Challenge 2026, but I have not received the dataset files or any link to access/download the datasets required for the challenge. Could you please let me know where I can access the training and test datasets, or share the appropriate dataset link with me? Thank you.	https://drive.google.com/open?id=1nzSol	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 0:53:48	Arush Sharma	Clauders	Are there any limits on the maximum size of the model we can use? I know we are not allowed to use API keys. I'm talking about models that we download from Hugging Face/unsloth etc., be it embedding models or anything else. Is there a cap like last time?	https://drive.google.com/open?id=1QBFW	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 0:56:08	Siddhi Shrivastav	HereWeGo	The dataset hasn't been shared yet	https://drive.google.com/open?id=1vTIa2	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:01:18	Shivam Naik	Confused By Deafult	Not able to get my user profile for Sage Maker AI	https://drive.google.com/open?id=1TYHh	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:01:49	Sarthak Nigam	Team Async	dataset link is not provided .	https://drive.google.com/open?id=1u663f	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:06:14	Granth Satsangi	Analytics Alchemy	Cant find the dataset	https://drive.google.com/open?id=1H-Rh	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:06:40	Venkatesh Shukla	Vijigishu	Where could we access the dataset from, since it was neither in mail, not the problem statement document?	https://drive.google.com/open?id=1naiWl	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:07:11	MUKUL	Aura Farmers	Uploading is stuck even at high speed internet	https://drive.google.com/open?id=1mtwn	
9/25/2026 1:07:45	Shri Mansaa S	Sigma Servers	I registered for the Amazon ML Challenge 2026 and created/activated my AWS account using my AWS Builder ID. The official challenge guide says that every participant should receive $200 in AWS credits, but my AWS Settings → Billing page currently shows Available credits: $0.00 and Amount due: $0.00. My UPI payment method is connected, t The challenge starts on September 25, 2026. When and how are the $200 AWS credits supposed to be applied to participants' AWS accounts? Is there an activation step I need to complete, or should I simply wait for the credits to appear?	https://drive.google.com/open?id=11iFl2	
9/25/2026 1:08:37	priyanka rani	relentness	not provided with data set	https://drive.google.com/open?id=1VUI4	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:11:25	Naman Sharma	Team Aurion	I am unable to find the dataset required to solve the problem statement	https://drive.google.com/open?id=1YnUd	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:11:51	Nikhil Kanbarkar	Team Claud	I have successfully registered for the Amazon ML Challenge 2026, but I am currently unable to see or access the $200 AWS promotional credits in my AWS account. Could you please guide me on the exact steps to claim them, or verify if they have been allocated to my account?	https://drive.google.com/open?id=1MiMh	
9/25/2026 1:12:38	Raghunandan Shaji	4ward	This may seem silly and forgive me if it does but I don't seem to be able to find the dataset anywhere. Also the "Code" button on Unstop takes me to a test like page where it says I will be proctored for 3 days which makes me weary of starting it. What if I end up closing that tab or session and will that affect my submission. I'd love to hear back on t	https://drive.google.com/open?id=1W6RL	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:12:45	Atharva Waghmode	PsychicLearn	Hi, I have a question regarding the AWS Student Rewards Skill Builder benefit. I successfully applied the $449 discount for the 12-month AWS Skill Builder Individual subscription, and the checkout shows an estimated payment of $0.00. However, when I try to submit the order, I receive the error "There was an error while submitting." The page also r	https://drive.google.com/open?id=1SQOY	
9/25/2026 1:13:48	Mishti Parikshit Gandhi	aziyat	I just wanted to ask if we're allowed to make multiple submissions for the 72-Hour hackathon?	https://drive.google.com/open?id=1aKPb	
9/25/2026 1:15:14	Anukrati Tiwari	Team Nova	Can we use AI assistant for coding ? It won't be considered as false measures or disqualification.	https://drive.google.com/open?id=1eW4h	Yes, you are allowed to use AI for coding assistance.
9/25/2026 1:16:00	Amulya Singabhattu	Innovexa	Dataset is not provided	https://drive.google.com/open?id=1v7Jw	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:19:20	Jathin vamsi Ganjikunta	GPT	Hello, The challenge guidelines mention that participants receive the problem statement and dataset on Day 1. However, I am unable to find where the dataset for the Business Entity Resolution Challenge can be downloaded/accessed. Could you please let me know where the official challenge dataset is provided? Thank you.	https://drive.google.com/open?id=1_J3DI	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:20:05	Sumit	Human-Intelligence	Where is Dataset ? , we should get it through mail !	https://drive.google.com/open?id=1QINW	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:22:07	sneha vishwakarma	AlgoTitans	not able to find the dataset.... explain from where and how to get it.	https://drive.google.com/open?id=1aGIM	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:22:45	Trishagni Chakraborty	Tech Mind	where is the data set ??	https://drive.google.com/open?id=1K4ZL	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:26:10	M Someshwar	65-Roses	Where can i access dataset??Is it mandatory to use AWS services (SageMaker) for model development, or can we use other platforms (Colab/Kaggle) for GPU-based components and bring the pipeline into AWS for final submission?	https://drive.google.com/open?id=1HTKo	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 1:27:47	Ayush Mittal	lockedin	I'm not able to avail the credits in aws and it it showing your free plan has ended.	https://drive.google.com/open?id=1dD6V	
9/25/2026 1:27:51	Yash Goel	LatentX	Could you please clarify the format of the Amazon ML Challenge assessment? Will the 72-hour hackathon involve only an ML problem-solving submission, or will there also be a separate proctored test/MCQ or coding assessment?	https://drive.google.com/open?id=1Grxvg	It is a 72-hour ML challenge/hackathon: build a solution and upload predictions to a leaderboard. There is no MCQ or coding round.
9/25/2026 1:30:39	Yatrik Prajapati	Team Diamonds	We are unable to locate the dataset download link/access for the Amazon ML Challenge 2026 (Business Entity Resolution). Details: - Challenge window: 25th Sep 2026, 12:00 AM IST to 27th Sep 2026, 11:59 PM IST - We have registered for the challenge and can access the Unstop portal - However, we cannot find the dataset files (train_source1.tsv, train_source2.tsv, train_source3.tsv, train_ground_truth.tsv, test_source1.tsv, test_source2.tsv, test_source3.tsv) mentioned in the problem statement - The problem statement references paths like "dataset/train/train_source1.tsv" but we don't see where to download these Steps followed: 1. Logged into Unstop portal 2. Navigated to Amazon ML Challenge 2026 page 3. Checked "Resources", "Dataset", "Problem Statement" tabs/sections 4. No downloadable dataset link found Could you please clarify: 1. Where exactly is the dataset hosted for download? 2. Is there a separate link/portal for dataset access? 3. Does the dataset become available exactly at 12:00 AM IST on 25th Sep? Please provide the direct download link or access instructions.	https://drive.google.com/open?id=1qPAX	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:33:24	Tanush Pavan V	AlgoPeeps	Where do we access the dataset from	https://drive.google.com/open?id=1uoEF	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:34:53	Vishal Kishore	RAID	For feature engineering, are we allowed to use publicly available static lookup dictionaries, such as a country → state/region → city mapping for the US, India, and France? For example, the dictionary may contain mappings such as: Austin → Texas → USA Mumbai → Maharashtra → India Lyon → Auvergne-Rhône-Alpes → France This would only be used for deterministic location normalization and feature extraction, not for adding labels or target-related information.	https://drive.google.com/open?id=1RThO	Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 1:35:39	Sreyaan Roy	Data Snipers	I havent received the dataset.	https://drive.google.com/open?id=1eiI..4a	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:35:59	Ayushmaan Singh	Qwen	We are not able to make submission, the submission is not happening, and I am stuck. It has been hovering with no progress since half an hour	https://drive.google.com/open?id=187ph

9/25/2026 1:47:58	Aditya Choudhuri	Mentalists	Subject: Clarification on Permissible Methods — Pretrained Model Weights 1. Are pretrained language model weights (e.g., BERT, XLM-RoBERTa) from public model hubs (Hugging Face) permitted? 2. Does "external data augmentation" apply to: (a) Business records or databases only, OR (b) Also to general-purpose NLP model weights? 3. If pretrained weights are permitted, is fine-tuning them on competition data permissible? 4. Are pretrained character/word embedding tables (e.g., fastText) considered "external data"? 5. Is the use of general NLP libraries (e.g., NLTK phonetic algorithms, spaCy for tokenization) permitted, or must all text processing be implemented from scratch?	https://drive.google.com/open?id=14MCz	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 1:49:01	Sharveshwaran N	BruteForce	I encountered a problem with the AWS sign-up process. I am unable to register because the captcha entry is incorrect. Even though I entered the correct captcha, it appears to be incorrect. Additionally, I attempted to sign up using another method, but I was unable to do so. Additionally, is there another opportunity to access different accounts for A	https://drive.google.com/open?id=1hVXN	
9/25/2026 1:50:40	SATYABRATA DAS	UNPAID ENGINEERS	How to access the dataset.....i am unable to found zip file or any download link to download the data set..... please help me regarding this....	https://drive.google.com/open?id=1zYb_i	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 1:51:41	Sarthak Jalan	VorteX	I cannot find the dataset and also the email containing the problem statement was not received by me...Its only received by one of my teammates....please look into this and provide me with the dataset so that I can start with my work.	https://drive.google.com/open?id=1R9zn	The dataset is on the Unstop portal and is visible only to the Team Leader's account. 9/25/2026 2:03:41	Tejashwini Gowda	Yoddhas	Can we compute unsupervised statistics, such as word-frequency weights, on the test records themselves?	https://drive.google.com/open?id=1scBX	Yes. Computing unsupervised statistics (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and generating synthetic pairs from the provided records are also fine.
9/25/2026 2:07:52	Rajarshi Mandal	CDS_Team_iisc	Can we use an address normalisation library that does not access any external api Or any external database	https://drive.google.com/open?id=1ZFzo	Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 2:08:55	Vishal Pillai	Tensor Troops	The challenge states that participants must use only the provided training data and prohibits external data lookup, APIs, and services for business identity/entity resolution. Could you please clarify whether using an open-weight model such as Google Gemma locally, without any external data retrieval or API-based lookup, is permitted under the ch	https://drive.google.com/open?id=1_zmw	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 2:09:24	Yatharth Kaushik	The potato Gang	can we use wordfreq to clean the data?	https://drive.google.com/open?id=1RpO4	Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 2:11:24	Bhawya Mishra	Outliers	The datasets required are missing/not accessible. We can access the problem statement and guidelines, but the dataset needed to train and evaluate our solution is unavailable. Please provide access or clarify where we can download it.	https://drive.google.com/open?id=1WUm	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 2:14:27	Dhanali Khandagale	Tattvam	I am unable to locate/access the dataset for the Amazon ML Challenge 2026. The problem statement mentions that the training and test datasets will be provided and lists files such as train_source1.tsv, train_source2.tsv, train_source3.tsv, train_ground_truth.tsv and the corresponding test files. However, I cannot find any dataset download link or	https://drive.google.com/open?id=1zniWS	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 2:32:59	onkar takmoge	Team Titans	its been an hour since ive uploaded the files and its not uploading. tried it twice yet stuck on this page	https://drive.google.com/open?id=1Qko1(	
9/25/2026 2:33:33	Tashi	Solo_Leveling	libpostal is a local address parser, not an API, but it is trained on external map data. Can we use the libpostal library?	https://drive.google.com/open?id=1z1wN	Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 2:36:24	Yashila Devi G K	Neural Nexus	Where did i acess the data set still i checked my mail and portal	https://drive.google.com/open?id=1QN17	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 2:42:03	Harshil Khanna	DhapichikiBuyeah	We are considering using Neo4j as an internal graph-based component in our ML pipeline. Specifically, we would construct a graph solely from the business records and ground-truth data provided as part of the challenge, and use graph-derived features/relationships as additional features for our ML model during entity matching. We would not us Would this use of Neo4j be permitted under the challenge rules?	https://drive.google.com/open?id=1PeRf	Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 2:42:17	Anshool Dahale	Team Alpha	Respected Sir/Ma'am, can you please provide some clarity with regard to these questions- 1.Which submission counts for the private leaderboard: the last one, the best public one, or one we select? 2.Is unsupervised use of the unlabeled test records allowed? For example, fitting TF-IDF on them or pseudo-labeling high-confidence pairs. 3.Does the 8B / MIT-Apache limit apply per model or to the whole ensemble? For example, LightGBM plus a sub-1B MIT transformer. 4.Are hand-written normalization dictionaries allowed, such as street-type or legal-suffix abbreviations like French "bd" → boulevard? 5.Is France present in both the public and private test splits?	https://drive.google.com/open?id=1M3p3	Yes. Computing unsupervised statistics (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and generating synthetic pairs from the provided records are also fine. Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries. Yes. France is test-only and appears in both the public and private test splits. Treat country as an open set of strings and do not hard-code to only US/India; every test entity must appear in your submission.
9/25/2026 2:46:24	Dev Soni	Nirvana1	When the Problem Statement says to stay under the limit of 8B parameters, ensure no live API calls are made from service entities, which I take to be big names like Claude, Gemini and ChatGPT models, and ensure the model has MIT/Apache 2.0 license: are we allowed to use something like TranslateGemma of 4B parameters as part of one-time dataset augmentor, preprocessing the rows in the dataset with different Indian languages and French? Ultimately: 1. Will this model's license be checked if it is only used for preprocessing? 2. Will its parameters (4B) be counted in the limits? 3. If I host it on my rented GPU, that would be fine, right? Will be very grateful if you could help our team with this crucial detail.	https://drive.google.com/open?id=1KRhN	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 2:50:43	Sachet Vijay	Team AMS	Unable to submit my solution v1	https://drive.google.com/open?id=1MAsy	
9/25/2026 2:52:23	Hrishabh Sharma	Last Minute Clutch	Is it allowed to fit unsupervised statistics, such as TF-IDF vocabulary/IDF weights or token frequencies, on the unlabelled test source files, with no labels or external data involved? This matters for handling France, which doesn't appear in training.	https://drive.google.com/open?id=1eOUf	Yes. Computing unsupervised statistics (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and generating synthetic pairs from the provided records are also fine.
9/25/2026 3:02:10	Amula Bhanuteja	Thunderbolts*	The dataset is not available in the provided files. The uploaded document contains only the problem statement, guidelines, and submission requirements. Where can I access the dataset from?	https://drive.google.com/open?id=1v1aN	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 3:03:32	Shivang Goliyan	GG	Hello, we have four short clarification questions about the rules (also in the attached PDF): 1. Test statistics for candidate generation: to build our blocking index for the test set, we compute unsupervised test statistics (e.g. TF-IDF / character n-gram document frequencies) over the unlabeled test source files, as any search index does. Is this permitted? 2. Pretrained weights: may we fine-tune publicly available pretrained model weights (MIT or Apache-2.0 licensed, under 8B parameters, e.g. a multilingual text encoder) on the provided training data? Does "Final model should be a MIT/Apache 2.0 License model and up to 8 Billion parameters" apply to every model in the pipeline (including retrieval/embedding models used for blocking) or only to the final matching model? 3. Private leaderboard: which of our submissions is evaluated for the final ranking: best public-score submission, latest submission, or one we select? 4. Methodology document: the guidelines ask for a 1-2 page document, but the problem statement says Documentation_template.md has no page limit. Which applies? Thank you!	https://drive.google.com/open?id=1_Hnoi	Yes. Computing unsupervised statistics (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and generating synthetic pairs from the provided records are also fine. Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. There is no page limit on the methodology document; follow the problem statement and prioritize clarity and technical depth.
9/25/2026 3:04:38	Ayush Kumar	Team Zypher	Unable to submit solution	https://drive.google.com/open?id=14xqN	
9/25/2026 3:09:54	Venkata Dharaneswara R	Straw Hat Coders	1. Are pretrained open-source embedding models permitted, provided the model is MIT or Apache-2.0 licensed and ≤8B parameters, or should the solution use only models trained from the provided challenge data? 2. For the private leaderboard/final evaluation, is the team's best-scoring submission selected, or is the last submission before the deadline used?	https://drive.google.com/open?id=1I7T2(	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/25/2026 3:14:04	Ronit Kumar Choudhary	kishut mariken	1 . Pre-trained open-weight models - Are general-purpose pre-trained models such as Qwen3-Embedding / Qwen3-Reranker / DeBERTa (Apache 2.0 or MIT, downloaded once from Hugging Face and fine-tuned only on the provided training data) permitted? No network calls happen at inference. 2. The 8B parameter cap — Is the limit per model, or the total across all models in the pipeline (e.g., an embedding model used for blocking plus a reranker used for matching)? Do models used only for candidate generation count? 3. Offline libraries with built-in reference data — Are libraries like libpostal (address parser trained on OpenStreetMap) or offline postal-code lists considered 'external data'? Is a small hand-written list of legal suffixes / abbreviations (Pvt, Ltd, SARL, Rd, St) acceptable? 4. Using the unlabeled test set — Is self-training / pseudo-labeling on the test set (using our own high-confidence test predictions as extra training signal, no labels or external data involved) allowed? 5. Synthetic data — Can we generate synthetic training pairs by applying noise transformations to the provided records, or by using a local ≤8B model to paraphrase records? No internet sources involved. 6. candidate_pairs.tsv in a cascade — If our matcher is a cascade (a first model scores all candidates, a second model rescores only uncertain ones), should the file contain the input to the first model? Please confirm.	https://drive.google.com/open?id=13XM-D	Pretrained open-weight models are allowed if they are MIT/Apache-2.0 licensed, up to 8B parameters, run offline (no live API calls), and fine-tuned only on the provided data. The limit is per model, so every model you use (embedder, reranker, matcher, or any preprocessing model) must independently meet it and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries. Yes. Computing unsupervised statistics (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and generating synthetic pairs from the provided records are also fine. candidate_pairs.tsv should contain the final candidate set actually fed to your matching model for inference (in a cascade, the input to the first scoring model). Every ID in matching_results.tsv must also appear in candidate_pairs.tsv.
9/25/2026 3:14:33	Vivek Kumar Barman	Clematis	Can not find the link to dataset or any instructions on where to find it, checked Unstop page and all emails and documents but they are only explaining things there.	https://drive.google.com/open?id=1Kqp4	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.

9/25/2026 6:03:37	Jasmitha S	Elite	Hello Team, I have received the Amazon ML Challenge 2026 problem statement and would like to clarify the workflow before starting the challenge. 1.Where can participants download/access the actual train and test datasets mentioned in the problem statement? 2.Is it permitted to develop and run the ML pipeline using Google Colab, or is AWS SageMaker/AWS infrastructure mandatory? 3.For the final submission, should matching_results.tsv be uploaded through the challenge portal, while candidate_pairs.tsv, source code, and documentation are included in the final ZIP package? 4.I am currently pursuing MCA and graduating in 2027. I have registered for the Amazon ML Challenge 2026 and received the problem statement. However, I noticed that the eligibility criteria lists PhD, M.E., M.Tech., M.S./MS by Research, B.E. and B.Tech., but does not explicitly mention MCA. Could you please confirm whether full-time MCA students graduating in 2027 are eligible to participate? Kindly clarify these points. Thank you.	https://drive.google.com/open?id=1fL5JI	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose. Yes, "matching_results.tsv" file is uploaded for leaderboard scoring. "candidate_pairs.tsv" is uploaded in the final zipped package. Yes, MCA students graduating in 2027 are eligible.
9/25/2026 6:13:22	Riddhiman Paul	Builders	The submission is not uploading. It has been loading for more than 20 minutes.	https://drive.google.com/open?id=1vEEYf	
9/25/2026 6:33:58	K Sai Abhiram	Null_Arsenal	I cannot find the dataset anywhere?	https://drive.google.com/open?id=1ITlWw	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 6:35:02	Gaurav Singh	CloudBrain	I would like clarification regarding the Business Entity Resolution Challenge. I understand that the task is to identify matching business records across Source 1, Source 2, and Source 3 using the provided training data. I would like to confirm the recommended approach for candidate generation/blocking and final matching, especially when one Source 1 entity can match multiple records from Source 2 and/or Source 3. I would also like to confirm whether standard ML libraries such as scikit-learn and LightGBM, along with Jaccard similarity, Levenshtein distance, and TF-IDF cosine similarity, are permitted when using only the provided challenge data and no external APIs, databases, geocoding services, or external business information. Finally, please confirm that candidate_pairs.tsv should contain the final candidate set that is actually passed to the matching model for inference.	https://drive.google.com/open?id=1OQuk	One Source 1 entity may match many Source 2/3 records. Your solution must not inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, LightGBM, pandas), general-language pretrained NLP/embedding models within the limits, any algorithm using only the provided records, and small hand-written normalization dictionaries. candidate_pairs.tsv should contain the final candidate set actually fed to your matching model for inference (in a cascade, the input to the first scoring model). Every ID in matching_results.tsv must also appear in candidate_pairs.tsv.

9/25/2026 7:33:21	Sathish Kumar M	Hacksmiths	I am a registered participant and team member in the Amazon ML Challenge 2026. The challenge has started, and I understand that the problem statement and dataset are supposed to be available from Day 1. However, I am unable to find the location or portal from where the challenge dataset can be downloaded. I have checked the challenge page and the available instructions, but I could not find a clear dataset download link or a separate challenge dashboard/login portal for accessing the dataset. Could you please clarify: 1. Where can team members access/download the challenge dataset? 2. Is the dataset available only through the Team Leader's account? 3. If so, where exactly should the Team Leader navigate to download it? 4. Is there any separate portal/login required for accessing the dataset? Thank you.	https://drive.google.com/open?id=1nLQbl	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 7:41:22	Pranavkumaran	CodeX	I am unable to login into the AWS console and use sagemaker, the CAPTCHA is not throwing 400 BAD REQUEST error, I tried with both chrome and brave	https://drive.google.com/open?id=1W2eh	
9/25/2026 7:43:34	Surja Pal	OSPREY	Dear Amazon ML Challenge Organizing Team, I am participating in the Amazon ML Challenge 2026 – Business Entity Resolution Challenge and am currently evaluating different open-source entity-resolution frameworks for my solution. I am considering using Zingg AI, an open-source entity-resolution framework, as part of my local entity-matching pipeline. Zingg is intended to perform entity resolution and blocking/matching using the datasets provided for the challenge. However, I noticed that the challenge guidelines specify that submitted models must comply with MIT or Apache 2.0 licensing requirements and be limited to 8B parameters. Zingg itself is distributed under the AGPL-3.0 license, which raises a question regarding whether its use is permissible within the challenge. To ensure strict compliance with the competition rules, could you please clarify the following: Is the use of an AGPL-3.0 licensed open-source framework such as Zingg permitted as a software dependency/tool in the submitted solution? Does the MIT/Apache 2.0 requirement apply only to the machine-learning model(s) submitted, or does it extend to all open-source libraries/frameworks included in the submitted code pipeline? If Zingg is used purely for local entity resolution/blocking/matching on the provided challenge datasets, without any external databases, APIs, geocoding services, or external data augmentation, would this comply with the challenge's fair-play requirements?	https://drive.google.com/open?id=1nfWd	
9/25/2026 7:43:54	Dhanya K Suvarna	return NULL	Could you please tell us where the dataset is?	https://drive.google.com/open?id=1D6vh	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 7:54:56	Praveen Kunche	Hashira Hackers	We didn't receive any dataset. You said we will receive the problem statement and dataset on day 1 but we didn't get the dataset where we only get the problem statement	https://drive.google.com/open?id=17CHq	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 7:56:35	Hritwik Bali	Liona	i made a submission and it didn't get scored	https://drive.google.com/open?id=1CYYK	
9/25/2026 8:03:39	Manya Kamath	Ciesta	We have received the problem statement. We had a small doubt whether you would be providing us with the dataset or if we should use a random dataset as there is no information related to dataset in the PS given	https://drive.google.com/open?id=1wJcA	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 8:06:17	Heena Attar	Phantoms	Dataset not accessible – Amazon ML Challenge 2026 Our team has received the problem statement and guidelines, but the dataset mentioned in the problem statement is not available in our Student Resources/portal. The guidelines state that teams will receive the problem statement with the dataset on Day 1. Could you please provide the official dataset download/access location?	https://drive.google.com/open?id=1RRPH	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 8:09:20	Vishnu Ram R S	H@CTIVATOR$	I can't able to find out the dataset for the problem statement in the unstop page. I refreshed it, cleared my browser cache but still not able to locate the dataset.	https://drive.google.com/open?id=1ar2Rc	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 8:13:36	Samudrala Kranthi Kuma	Hanu-man	I am not able to submit my files	https://drive.google.com/open?id=1WFE1	
9/25/2026 8:14:01	Sakshi Mane	AlgoNova	I have received the problem statement for the Amazon ML Challenge 2026, but I could not find any information regarding where the dataset is provided or how we can access it. Could you please clarify where the dataset is available? Also, are we allowed to develop and train our ML solution entirely on our local machine using Python, Jupyter Notebook, or VS Code, or is it mandatory to use AWS SageMaker? If AWS SageMaker is required, could you please clarify which AWS services/tools are mandatory and whether there are any AWS-specific requirements for the final submiss	https://drive.google.com/open?id=1LjIh_	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF. Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 8:16:42	Hamsini Sri Akkineni	TechSpark	I cannot find the actual training and test `.tsv` dataset files mentioned in the problem statement. 			Subject: Clarification regarding assessment timer and dataset access – Amazon ML Challenge 2026 Hello Team, I have a couple of questions regarding the Amazon ML Challenge 2026 assessment:		The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 10:05:38	Madhugna Yelchuri	CMP Coders	Once I click Start on the Unstop assessment, the instructions say that the assessment must be attempted in one sitting and that the timer will not stop. Does this mean I need to keep my laptop and the assessment page open continuously until I submit? Or can I safely close/shut down my laptop and resume the assessment later while the timer co Where can I access/download the problem statement and dataset? The guidelines mention that all teams will get access to the problem statement and dataset on Day 1, but I currently only see the Start box on the assessment page and no dataset/download option. Is the dataset made available only after clicking Start, or should there be a separate download link/resource available before starting the assessment? I would appreciate clarification before starting the assessment so that I don't accidentally affect my attempt or miss the dataset. Thank you!	https://drive.google.com/open?id=1WWP	
9/25/2026 10:06:01	Hitansh Jain	COMPUTATION_ISSUE	Issue in uploading the submission files (is there any restriction related to size of files)	https://drive.google.com/open?id=1FJkkh

9/25/2026 10:25:11	Om Amit Mohite	OG	We followed all the constraints and criteria but still it showed failed, kindly fix it, and will we loose our 1 submission due to your mistake? if yes we need full compensation of lost chance.	https://drive.google.com/open?id=1uxOk	
9/25/2026 10:26:30	Ramaswaram Bhavana	Tensor Titans	We'd like clarification on three points not addressed in the challenge rules/email: Are publicly available pretrained models (e.g., open-source sentence embedding models like MiniLM, or other Hugging Face models) allowed for feature extraction or as part of the solution pipeline? Is the use of external datasets (beyond the provided train/test files) permitted for training or augmentation? Is the use of AI coding assistants (e.g., ChatGPT, Claude, GitHub Copilot) permitted for writing/debugging code and generating feature ideas, and if so, are there any restrictions (e.g., must all submitted code be self-written, disclosure requirements)? Clarifying these would help us stay compliant while building our solution. Thank you.	https://drive.google.com/open?id=1GA7a	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. The packages shouldn't inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets, large static country/state/city tables). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, pandas), general-language pretrained NLP/embedding models within the limits (e.g. fastText, wordfreq fine), any algorithm using only the provided records, and small hand-written normalization dictionaries. Yes, AI coding assistants are allowed.
9/25/2026 10:26:33	Mohd Shoeb	Engineers	I can't find dataset	https://drive.google.com/open?id=1tznCC	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 10:28:07	Sai Pranav S R	BrawlDevs	Regarding the proctoring surveillance notice on the test page: Do we need to stay logged in with the browser window open for the entire 72 hours, or can we download the dataset and work offline/on external GPUs, logging back in only to submit our results? Thanks!	https://drive.google.com/open?id=1cu06q

9/25/2026 10:47:33	Aman Kumar Maurya	Embedding	Team "Embedding" (Team Leader: Aman Maurya). On 25 Sep 2026, around 10:05 IST, we submitted on the ML Challenge round page (competitions/1743604/round/1593683). We uploaded matching_results.tsv (96 MB, validated PASS with the official utils/validate_submission.py, including --check-ids) in the "Upload Matching Results File" field, an Questions: (1) Did this attempt count towards our 5 daily submissions? If it did, can it be restored, since it never uploaded or evaluated? (2) What is the maximum upload size for each field? (3) Should the per-submission "Upload Code File" be the code-only zip (src, README, requirements, methodology document; about 8 MB), or the full final package including output/candidate_pairs.tsv? For us that file is 1.28 GB uncompressed, which makes the package about 580 MB zipped. Thank you.	https://drive.google.com/open?id=1hVTL	
9/25/2026 10:47:42	Kavya Jain	Optune	1)is usage of a pretrained Open Source model covered under Apache 2.0 license allowed?	https://drive.google.com/open?id=1naLJ8	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.

9/25/2026 10:52:11	Soumodeep Karmakar	hehe i do ml	[URGENT BUG REPORT - Submission Portal Lockout for Team "hehe i do ml"] Dear Amazon ML Challenge Technical Team, Our team is experiencing a critical backend submission bug on the Unstop portal that has completely locked our ability to submit: 1. Initial Failure Without Diagnostics: At 09:47 AM IST, we submitted our matching_results.tsv file. The status remained in "Evaluating" for ~25 minutes and then abruptly marked as "Failed" without any error log, traceback, or reason provided. 2. Local Validation Passes 100%: Before and after submitting, we verified our file using the official script: `python3 utils/validate_submission.py --matching matching_results.tsv --test-dir dataset/test --check-ids` Result: Exit code 0 ("PASS — no blocking issues found. Safe to submit.") with all 1,732,544 rows perfectly aligned to test_source1.tsv. 3. Server-Side Submission Lockout: When we attempt to re-upload the file, clicking "Submit & Evaluate" causes the page to silently reload without registering any new submission entry. The submissions log remains completely frozen on attempt #1 ("Failed"), and no new evaluation job is triggered. It appears our team ID ("hehe i do ml") has a hanging lock or unreleased worker state on the backend following the first failed evaluation. Could you please urgently clear/reset the submission state for team "hehe i do ml" and inspect the backend worker logs to allow us to submit? Thank you, Team "hehe i do ml"	https://drive.google.com/open?id=1Kp5b

9/25/2026 10:55:48	bollam bhuvana sri	Simple coders	We are developing an AI-powered smart shopping assistant that helps users make better and more informed online purchasing decisions. Currently, users often spend more than their planned budget, struggle to compare similar products, and have difficulty understanding large numbers of customer reviews. They may also purchase products they do not actually need. Our solution uses AI to understand the user's requirements and budget, compare products, summarize customer reviews, identify similar products, and provide personalized recommendations. The system can also alert users when a purchase exceeds their planned budget. The goal is to make online shopping smarter, more personalized, and budget-friendly while helping users save time and make informed decisions.	https://drive.google.com/open?id=1-9aMi

9/25/2026 11:50:35	Ananya Khanduja	VisionML	it's not submitting it's uploading but not submitting please guide	https://drive.google.com/open?id=19X3S	
9/25/2026 11:51:27	Aayush Barhate	GradeB	Submit not working, i have been trying to submit since last 4 hours. whenever i try to upload its stuck on 0. please fix	https://drive.google.com/open?id=1e8ZIU	
9/25/2026 11:51:59	Arnav Joshi	Random Forest Rangers	I am trying to make submission from 5-6 hours but every time I try the loader gets stuck at 0% and never proceeds further. I am unable to make a single submission and hence loosing valuable insights and time. I have tried reducing size but the .tsv file has to be 97mb because of its size. Please help me fix it.	https://drive.google.com/open?id=1kovXv	
9/25/2026 11:54:20	Purv Kabaria	Businessmen	Evaluation on our submission is failing, and providing a score of 0 even though the tsv file is valid.	https://drive.google.com/open?id=1BydzF	
9/25/2026 11:54:39	Shenbagaraj M	BlackLoops	I need clarification on the recommended approach for handling noisy business names and addresses, especially for generating accurate candidate matches while minimizing false matches and improving the F0.5 score.	https://drive.google.com/open?id=1Y83oI	Your approach is allowed as long as it uses only the provided data. Tips from the problem statement: invest in strong blocking, since it caps your recall. Use string-similarity features (Jaccard, Levenshtein, TF-IDF cosine). Tune for precision, because F0.5 penalizes false merges. Don't neglect singletons: an empty prediction scores 1.0 on an entity with no true match. Keep your blocking lean, because fewer comparisons are encouraged: approaches that generate a smaller candidate set per Source 1 entity will be ranked higher in the final evaluation.
9/25/2026 11:56:39	Akshar Mukeshbhai Chav	Bytetracker	I have not got the dataset even when I'm the team leader	https://drive.google.com/open?id=1Tewd	The dataset is on the Unstop portal and is visible only to the Team Leader's account. 9/25/2026 12:05:44	Ashmit Singh	Avlokan	The matching_results.tsv file is not getting evaluated even though it passes the validation test. The progress is stuck at 0.	https://drive.google.com/open?id=1PzG-I	
9/25/2026 12:07:13	Vedansh Manmohan She	Lazarus	Will more countries / languages be added to the dataset when making the private leaderboard or is it strictly limited to French, Indian languages and English for even the final evaluation ?	https://drive.google.com/open?id=1iTVuy	The private leaderboard is scored on the same test files you already have. So it covers the same three countries (US, India, France), and no new countries or languages are added. The same business can appear in different scripts across sources. For example, a name may be in an Indic script in one source and in Latin script in another, so your pipeline may need to match across scripts.
9/25/2026 12:07:50	sai gadwe	ATHENA	I'm the team leader where Can I find that exact dataset? I'm not able to find?	https://drive.google.com/open?id=1pfUG	The dataset is on the Unstop portal and is visible only to the Team Leader's account. 9/25/2026 12:29:33	Britani Porwal	Thesis Solvers	Are offline, rule-based text-processing libraries like anyascii, uroman, ftfy, textdistance, regex, and unicodedata2 allowed? They don't use models or network calls and contain no geographic, postal, or business data, only general text and Unicode rules. Also, can MIT/Apache pretrained models like IndicXlit be used offline as-is, without any fine-tuning?	https://drive.google.com/open?id=1Sf7r7j	Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, uroman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g., IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.
9/25/2026 12:31:53	Sharukesh Mahendran	Outliers	My submission has been stuck at 0% for the past hour i have been trying from 10:00 AM IST, I have tried it twice and i am facing the same issue, please look into this	https://drive.google.com/open?id=1vFVDl	
9/25/2026 12:34:32	Varun Gupta	VOID	Hi team, I am facing issues with submission when i did my first submission it failed and I was not able to check exact failure reason and after that when I am trying to upload a new submission it is stuck on loading since last 1 hr can you help me with that please.	https://drive.google.com/open?id=1Uy6sG	

9/25/2026 12:35:38	Aniket Mandal	HackOverflow	Does failed submission count towards daily limit?
			Is there a file size limit?
			Issue Description:
			When attempting to submit the matching_results.tsv file on the competition portal (/competitions/1743604/round/1593683/play/code), the submission dialog gets permanently stuck on "Please Wait (0)", and the file is never uploaded to S3.
			
			Upon inspecting Developer Tools (Network & Console), we identified the exact root cause:
			
			Root Cause Analysis (Technical Details):
			Missing Windows MIME Type for .tsv: In Windows (Chrome / Edge / Chromium browsers), the .tsv file extension has no default registered MIME type in the OS registry. As a result, the HTML5 File API evaluates file.type as an empty string "".
			
			Backend API Rejection: When submitting, the portal triggers:
			
			Endpoint: POST /api/code-contest/create-presigned-url-for-upload-ml-submission
			Request Payload:
			json
			
			{
			"codeContest": 290344,
			"file_name": "matching_results.tsv",
			"file_type": ""
			}
			Because file_type is an empty string "", the backend server rejects the request with HTTP 400:
			
			json
				https://drive.google.com/open?id=12RDs	

9/25/2026 12:36:04	Pankaj kumar	LoopWire	{
			"status": false,
			"data": {
			"url": "",
			"file": "matching_results.tsv"
			},
			"message": "Bad Request"
			}
			Frontend Exception & UI Freeze: The frontend callback (chunk-6WHE4DFA.js) expects a valid URL in the response. When the backend returns "url": "", the Angular component attempts to process the response and throws an unhandled exception:
			
			ERROR TypeError: Cannot read properties of null (reading 'filter')
			at t.getLastSource (chunk-6WHE4DFA.js:13:133229)
			at Object.next (chunk-6WHE4DFA.js:13:132583)
			Because of this unhandled error, the upload process aborts, and the "Please Wait 0" modal hangs indefinitely without displaying any error message to the participant.
			
			Suggested Fix for Portal Engineers:
			Frontend Fallback (chunk-6WHE4DFA.js): When passing file_type to create-presigned-url-for-upload-ml-submission, add a fallback for empty MIME types:
			javascript
			
			const fileType = file.type || (file.name.endsWith('.tsv') ? 'text/tab-separated-values' : 'text/plain');
			Backend Validation: Allow file_type to accept text/tab-separated-values, text/plain, or default to TSV when file_name ends with .tsv and file_type is blank.
			Error Handling: Catch non-200 / status: false responses from the presigned URL endpoint and display a visible error toast instead of crashing on getLastSource.
			Thank you for your attention to this issue!

9/25/2026 12:41:44	Ayushi Bhati	apple pie	I have been trying to submit my TSV files, but the submission process is not progressing. The upload bar remains stuck on "Please wait" and does not complete, even after waiting for several hours. Initially, the platform would not allow me to submit the TSV files without including the complete ZIP folder as well. I therefore submitted the ZIP folder along with the TSV files. However, the submission remained stuck on the loading screen for around 2 hours and ultimately did not get submitted. After trying again, the option to upload the ZIP file completely disappeared, but no submission was recorded or accounted for either. This issue is preventing me from submitting my work. Could you please look into this urgently and confirm whether my submission can be accepted or whether there is an alternative way to submit the required files?	https://drive.google.com/open?id=179ixR

9/25/2026 13:02:58	Bhavik Tadvi	Tech_Innovators	object: Urgent SageMaker JupyterLab quota issue blocking Amazon ML Challenge 2026 participation We are participating in the Amazon ML Challenge 2026 as Team Tech_Innovators. The 72-hour ML Challenge has started, and our team is currently unable to use the required Amazon SageMaker Studio JupyterLab environment for the challenge. When attempting to start our SageMaker Studio JupyterLab Space using the required ml.m5.4xlarge instance, we receive the following error: "Quota limit reached. Request an increase in [AWS Service Quotas] or contact your administrator to request a quota increase on your behalf." We checked the AWS Service Quotas console in the Asia Pacific (Mumbai) / ap-south-1 region. The quota "Studio JupyterLab Apps running on ml.m5.4xlarge instances" currently has an applied account-level quota of 0. We have already submitted a quota increase request for this quota from 0 to 1. AWS has opened support case 179032079500529, and the quota request currently shows the status "Case Opened." Since the Amazon ML Challenge 2026 is a time-bound 72-hour challenge running from 25 September to 27 September 2026, this quota issue is currently preventing our team from setting up the required compute environment and beginning the ML solution development. We kindly request the Amazon ML Challenge team to please review this issue and advise us on the appropriate way to proceed, or help us obtain access to a suitable SageMaker compute environment for the challenge at the earliest possible time. We have attached a screenshot showing the current SageMaker quota status and the submitted quota increase request. Team: Tech_Innovators AWS Region: ap-south-1 (Asia Pacific – Mumbai) Requested instance: ml.m5.4xlarge Quota requested: 1 AWS Support Case: 179032079500529	https://drive.google.com/open?id=1UtKV	
9/25/2026 13:05:16	Jitin Raju	PsyDuck	I tried uploading the matching_results.tsv in the submissions page but it is taking unusually long to process it, even after 15 minutes, it couldn't process 1%. 9/25/2026 13:59:13	R S Hareecharan	teamGanesha	Constraint 5 permits a final model under MIT/Apache-2.0 up to 8B parameters. The Fair Play section prohibits "external data augmentation from internet sources." Does downloading and running a pretrained open-weight embedding model locally (e.g. an Apache-2.0 multilingual sentence encoder, well under 8B params) count as a permitted model	https://drive.google.com/open?id=1vpPlQ	
9/25/2026 14:00:59	Borra Vamshi Thirumal R	Team Friday	We would like to request one additional submission attempt for our team. Our first submission was marked as Failed even though we had thoroughly checked the .tsv file against the provided submission requirements and validator and found no formatting or structural issues. When we attempted the second submission, the evaluation went throu As we have already lost an attempt due to the failed evaluation, we kindly request that the failed attempt be restored or that one additional submission attempt be granted to our team. We would also appreciate it if you could let us know the specific reason for the Failed status so that we can address it before making another submission.	https://drive.google.com/open?id=1Jakxo	
9/25/2026 14:01:15	Siddhartharaja Tarmana	Team Kanyarasi	I'm unable to find my welcome package. On the home page it says that I'm not verified. But when I go into student details it that I'm already verified.	https://drive.google.com/open?id=1pSEVI	
9/25/2026 14:02:20	Naveen	Shaitan Gali	Subject: Submission marked Failed despite passing official validator Hello Amazon ML Challenge 2026 Team, I am facing an issue while submitting my Business Entity Resolution Challenge prediction file. I generated the required matching_results.tsv using the official test dataset and submitted it through the leaderboard. The submission was marked "Failed". I verified the file locally and confirmed that it passes the provided submission validator, including the ID checks. Important details: - File: matching_results.tsv - Number of prediction rows: 1,732,544 - Header: source1_entity_id matched_entity_ids - The file contains predictions for every test Source-1 entity. - Empty matched_entity_ids are used where no match is predicted. - SHA-256: 6:28eff727fa839c61440e0c0d3639d44af8331145e9500f13afd881629e515ba526 I also submitted an all-empty diagnostic matching_results.tsv. That submission was successfully evaluated and received a score of approximately 0.06. This indicates that the leaderboard evaluation system is functioning and that the upload format itself is accepted. However, the actual prediction file consistently results in "Failed", even though it passes the provided validator. Could you please check why this particular prediction file is failing during evaluation? I can provide the prediction file, validator output, screenshots, and any additional information required. Thank you.	https://drive.google.com/open?id=1-Lky1T	
9/25/2026 14:06:59	Mithilkumar Vasava	Neural_nexus_strikesbac	The submission shows "failed", even after trying 3 times. The format is verified with the validation script.	https://drive.google.com/open?id=1ChOA	
9/25/2026 14:09:34	Nishtha Jain	Debug Dynasty	Team: Debug Dynasty (leader: nishthajain9315@gmail.com). Leaderboard upload is stuck at 0% since about 3:15 AM IST, 25 Sep, and no submission has been recorded. The problem: On the ML Challenge round page, we attach matching_results.tsv and click Submit & Evaluate. A "Please Wait" dialog appears with the progress bar at 0, and it never moves. First attempt: about 3:15 AM on home Wi-Fi, stuck for more than 1.5 minutes. Second attempt: about 3:40 AM on a mobile hotspot, also stuck at 0 (left for several hours). Third attempt: about 2:00 PM today, stuck at 0 again. After refreshing, nothing appears on the Leaderboard for our team, so we have 0 successful submissions on Day 1. Our file: matching_results.tsv, tab-separated, 93 MB. 1,732,545 lines (header plus one row for each of the 1,732,544 test Source-1 entities). It passes the official utils/validate_submission.py with --check-ids ("PASS — Safe to submit"). The size comes from the required format (one row per entity), so we can't make it much smaller. Questions: Is there a file-size limit or a known upload issue, and is there an alternative way to submit (compressed file, drive link, email)? The portal changed: last night the page had two upload slots ("Upload Matching Results File" and "Upload Code File (zip)"). Now only "Upload Matching Results File" is shown. Can you confirm this change is intentional, that leaderboard uploads need only matching_results.tsv, and that the code and documentation zip is submitted only once as the Submission slots: will the Day-1 submissions we couldn't use because of this issue be counted or compensated? Browser: Microsoft Edge on Windows 11	https://drive.google.com/open?id=1NKpR

9/25/2026 14:16:08	NIRANJANA R	Team Astro	We've observed that some business_name fields in the dataset are written in regional Indian scripts (e.g. Kannada, Telugu) rather than English, while the corresponding business_address for the same entity is in English. This means name-similarity matching across sources may require converting text to a common script before comparison. Our question: does using an offline, rule-based transliteration library (e.g. one that maps regional-script characters to Latin script algorithmically, running entirely locally with no network calls) count as 'external data lookup' under the fair-play rules? We want to confirm before using one, since the rules prohibit external databases, APIs, or services u We are not looking to call any external API or online service for this — only to use an offline library for script conversion as a preprocessing/normalization step, similar to lowercasing or punctuation stripping. Could you confirm whether this is permitted?	https://drive.google.com/open?id=1t3XU	Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, unoman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.

			Both of our matching_results.tsv uploads today show status "Failed" with no reason displayed: 1) 25 Sep 2026, 12:27 PM IST (file 100,717,571 bytes) 2) 25 Sep 2026, 12:57 PM IST (file 99,630,213 bytes) Both files pass the provided utils/validate_submission.py (PASS, no blocking issues). We also verified independently: exactly 1,732,544 rows, one per entity in test_source1.tsv in the same order, header "source1_entity_id<TAB>matched_entity_ids"; every matched ID exists in test_source2.tsv / test_source3.tsv; no duplicate IDs in any list; no S1 - IDs		
9/25/2026 14:22:22	Sujanraj S	DarkRisers	Questions: 1. What caused the evaluator to mark these as Failed? No error message is shown on the portal. 2. Is there an upload size limit? Full-test-set submissions are necessarily around 100 MB. 3. Do these two failed attempts count against our 5 submissions for today? If so, can they be restored? 4. At the start of the challenge the portal showed a code.zip upload box, which has since been removed, leaving only the TSV upload. Please confirm this is intended. Registered email: sujanraj06032005@gmail.com. Team: DarkRisers. Browser: Chrome on macOS. Thank you.	https://drive.google.com/open?id=1Ngnh	
			Hi team, We have a clarification question regarding the "no external data lookup" rule for the Business Entity Resolution challenge.		Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, uroman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.
9/25/2026 14:24:55	Abhishek Agrawal	Algora	Our dataset contains business names/addresses in multiple non-Latin scripts (Tamil, Telugu, Malayalam, Devanagari). We'd like to use an offline, rule-based transliteration library (e.g., indic-transliteration, MIT-licensed) to convert these to Latin script for better name/address matching. This library performs a fixed algorithmic script-to-sound mappi	https://drive.google.com/open?id=1XmhT	
			Could you please confirm whether this kind of offline transliteration (script conversion only, not translation or entity lookup) is permitted under the "no external data lookup" rule, or if it would be considered external data augmentation? Thanks!		
9/25/2026 14:31:22	shravani Sadawarte	SparkX	I am unable to upload my matching_results.tsv file for the Amazon ML Challenge 2026. 9/25/2026 14:43:18	satvik aderla	XCalibur	1. "Are participants allowed to use the unlabeled test records themselves during inference and training? For example: fitting TF-IDF/statistics on the test data, grouping test Source 2/3 records with each other, or self-training on high-confidence test predictions?" 2. "Does the 8B-parameter limit apply to each individual model or to the combined pipeline (e.g., an embedding model + a reranker + an LLM)? Are gradient-boosted tree models (LightGBM/XGBoost) counted as 'the final model'?" 3. "May a permitted open model (≤8B, MIT/Apache) be used offline to generate synthetic training pairs or normalization tables (e.g., abbreviation expansions), as long as no external data sources are queried?" 4. "Are hand-written normalization rules based on general domain knowledge (e.g., 'Rd'='Road', 'R'='Rue', US state abbreviations, legal forms like SARL/Pvt Ltd) considered 'external data'?" 5. "Can open-source libraries that contain built-in rule tables be used, such as Unicode/ICU script transliteration (e.g., Devanagari/Telugu → Latin) or address parsers like libpostal?" 6. "Is the test set generated with the same process and noise patterns as the training set (including France), and is the proportion of Source 1 entities with no matches roughly similar?" 7. "Can a Source 2/3 record in the test set match more than one Source 1 entity, and is test Source 1 fully deduplicated like train?" 8. "Do matching records always share the same country label in the test set?" 9. "How is the public/private leaderboard split made: random by Source 1 entity, or stratified by country? Does the public subset include France?" 10. "How many leaderboard submissions are allowed per day, and is the final private score taken from our best, last, or a selected submission?" 11. "For final verification, is there a runtime or hardware limit for reproducing our pipeline (e.g., must it run on CPU, within N hours)? Is running heavy steps on cloud notebooks such as Kaggle or Colab acceptable?" 12. "Does the size of candidate_pairs.tsv (recall ceiling / reduction ratio) affect ranking or tie-breaking in any way, or is it only for analysis?" 13. "Are models under other permissive licenses (e.g., BSD, CC-BY-4.0) allowed, or strictly MIT/Apache 2.0? Does the license rule apply to libraries too, or only to trained models?" 14. "Is an ensemble of multiple models allowed as the final solution?"	https://drive.google.com/open?id=1GDVy	Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine. Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. You don't have to use a pretrained model. Classic ML models you train yourself (e.g. LightGBM, logistic regression) are fine. You can also run an allowed model on your own machine or server (e.g. through vLLM or Ollama), as long as it makes no calls to third-party or internet services. The packages shouldn't inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets, large static country/state/city tables). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, pandas), general-language pretrained NLP/embedding models within the limits (e.g. fastText, wordfreq fine), any algorithm using only the provided records, and small hand-written normalization dictionaries. A small hand-written list of state names and their abbreviations (e.g. TX = Texas, MH = Maharashtra) is fine. City-level or postal tables are not. Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, uroman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.

9/25/2026 15:11:51	Kshitij Choudhary	Cargo Cult	Subject: Unable to Upload TSV Submission – "Please Wait" Issue Hi Team Amazon ML Challenge 2026, I am facing a technical issue while trying to upload my .tsv submission file for the Amazon ML Challenge 2026. When I upload the file, the submission page keeps displaying "Please wait" and does not proceed further or complete the upload. I have already tried the troubleshooting steps mentioned in the instructions, including: * Clearing browser cache and cookies * Trying a different browser * Using Incognito/Private mode * Changing my internet connection/network * Retrying the upload multiple times However, I am still facing the same issue and am unable to submit my solution. Since the challenge submission window is time-sensitive, I request you to please look into this issue and help me resolve it as soon as possible. I have attached a screenshot of the issue for your reference. Please let me know if you require any additional details, such as my registered email ID, team details, or the submission file. Team Name: Cargo Cult Registered Email: kshitij7667@gmail.com Thank you for your assistance. Regards, Kshitij Choudhary Team Cargo Cult	https://drive.google.com/open?id=114aJ

Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
			Team ID: 5918837! | Team lead user ID: 19621089 | Competition ID 1743604, Round ID 1593683 ISSUE: Every ML submission we make uploads successfully but is marked "Failed" with no score and no error message. None of our submissions has been evaluated so far. AFFECTED SUBMISSIONS (25 Sep 2026, IST): 1. ID 3671537 - 11:55 AM - Failed 2. ID 3671586 - 12:20 PM - Failed 3. ID 3671660 - 12:53 PM - Failed (uploaded from incognito) 4. ID 3671757 - 01:32 PM - Failed (test file with only empty predictions) 5. Latest re-upload - Failed		
9/25/2026 15:19:03	Gade Joseph Preetham R	Synergy	WHAT WE VERIFIED: 1. File format is correct: our matching_results.tsv passes the official validate_submission.py from the student resource kit with no errors (1,732,544 rows, correct header, all IDs valid). Even a minimal file with only empty predictions fails the same way. 2. Upload completes: the presigned URL request succeeds, the file upload returns HTTP 200, and the submission request sends the form field submissionFile = https://d8l4huxumps27.cloudfront.net/ml-round-submission/code-contest/output/production/2903446ab632ac34b60_matching_results.tsv 3. The submission record does not save the file: in get-user-ml-submissions/403489 every submission shows status -1, score null, source "" (empty), source_md5 null, execution_time null. created_at, finished_at and updated_at are identical (e.g. 13:32:35 for ID 3671757), so the submission is marked finished instantly and the evaluator never receiv We also tried incognito mode, logging in again and re-uploading. Same result every time. REQUEST: 1. Please check the evaluation logs for these submission IDs. 2. Please fix the issue where the uploaded file is not linked to the submission (source saved empty). 3. Please re-evaluate these submissions or restore these attempts to our submission count, since none were scored. The challenge ends on 27 Sep, so we would be grateful for a quick resolution. Screenshots are attached as a PDF. We have also emailed support@unstop.com with the same details.	https://drive.google.com/open?id=1cxKcr

9/25/2026 15:31:13	Lohitha Kuncham	CodeCrafters	I am trying to create a JupyterLab application in Amazon SageMaker Studio for my AWS account. However, I am unable to create the application. I receive the following error: "The account-level service limit 'Maximum number of running Studio apps allowed per account' is 0 Apps, with current utilization of 0 Apps." Because the quota is set to 0, I cannot create or run a JupyterLab Studio application, even though there are currently no running Studio applications. I would like to use Amazon SageMaker Studio/JupyterLab for an ML project and need permission to create at least one Studio application. Request: Please increase the account-level quota "Maximum number of running Studio apps allowed per account" from 0 to at least 1 (or the appropriate minimum required value) so that I can create and run a JupyterLab application. Service: Amazon SageMaker Feature: SageMaker Studio / JupyterLab Issue: Studio application creation blocked because the account-level quota is 0.	https://drive.google.com/open?id=1q2Jag	
9/25/2026 15:31:35	K Akshay Rao	Vector Group	I'm unable to submit my matching_results.tsv (97.3 MB). After selecting the file and clicking Submit & Evaluate, the page shows a "Please Wait" dialog with the progress counter stuck at 0 and it never completes even after waiting for 20-30 mins	https://drive.google.com/open?id=1pkodG	
9/25/2026 15:31:36	Harshit Tiwari	PCA	Unable to login in the Aws console as root user .. again and again captcha error	https://drive.google.com/open?id=1VDkX	
9/25/2026 15:31:57	Aravindh Balaji	Titan Grandmasters	we wanted to use the sage maker AI in aws but we are not able to as our service quota for notebook instance was set to 0 and we have been waiting with no response and the time is just going can we train it locally if the request cannot be satisfied in sometime?	https://drive.google.com/open?id=1rOtlkc	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 15:32:48	Ranveer Gautam	Amizon	Semi-Supervised Learning : Using unlabelled test records for training Actually, The training data contains only US and India, while the test set also contains France. We would like to know if these are allowed: We train our model on the training data (with the provided ground-truth labels). We use this model to predict on the test set. We take only the test pairs where the model is very confident, and use the model's own predictions as labels. No real test answers are used, and no external data or APIs are used. We add these pairs to our training data and train the model again, so it can learn the French format. This is called pseudo-labelling (semi-supervised learning). The rules say the challenge should be solved "using only the provided training data". Is it allowed to use unlabelled test records in this way, or should the model be trained only on the training data?	https://drive.google.com/open?id=11e7CI	Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine.
9/25/2026 15:33:30	Tanish Virmani	Plus One	I have been trying to upload my submission thrice which is taking around 2.5hours to proceed and its showing us "Please Wait" till now	https://drive.google.com/open?id=1BsxSy	
9/25/2026 15:33:38	Aishwarya Verma	Midnight_SheBuilders	I had uploaded both my files(matching results + the zip code file) and I had uploaded the file yesterday around 4 am and till now the files had not been submitted and its showing please wait , kindly look into the issue of uploading file as it is taking a lot of time which can lead to our loss, and also the size of the file is not at all big (zipped code file i	https://drive.google.com/open?id=1dAbZI	
9/25/2026 15:34:13	Satyam Pandey	UntrainedModels	1) Are pretrained multilingual language model weights (e.g. XLM-R, DeBERTa, multilingual sentence transformers) permitted as part of the solution? 2) Is it permitted to use the test set records themselves to adapt or fine-tune the model at inference time (i.e. unsupervised adaptation using only the provided test files, no external data)?	https://drive.google.com/open?id=1cAcL	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine.
9/25/2026 15:36:56	Arjeet Singh	Fratbrat	Multiple attempts to submit the tsv file but its stuck at 0% and doesnt show any error	https://drive.google.com/open?id=1wO_2	
9/25/2026 15:37:02	Nss Pranathi	Innovexa	I can't find the code and dataset link	https://drive.google.com/open?id=1ZYRA	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.

The "Upload Matching Results File" upload gets stuck at "Please Wait 0" indefinitely — tested for 20+ minutes with no progress. I confirmed this is not a file-size or file-content i	https://drive.google.com/open?id=1ZtvB2	
9/25/2026 15:42:26	Shashank Shekher Chou	code-n-smok	We are working on the Business Entity Resolution challenge. The problem statement explicitly prohibits "external data lookup" — including entity resolution APIs, business registration lookups, geocoding APIs, and general external data augmentation from internet sources. Some business records in Source 2/3 (India) have their business_name written in Devanagari (Hindi) script, while the corresponding matching record in Source 1 is in English (e.g., "नारायण कुल आइसेट लिमिटेड" vs "Sa Food Private Limited"). To match these correctly, we would need to either: Use a translation/transliteration API (e.g., Google Translate API, a transliteration service) to convert the Devanagari text to English/Romanized text, or Write our own rule-based phonetic transliteration function (a static character-mapping algorithm, not calling any external service). Could you please clarify: Is using a translation/transliteration API or external library that calls the internet allowed for this specific preprocessing step (script normalization), or is it considered "external data lookup" and therefore disallowed? Is a self-written, rule-based transliteration function (no internet calls, no external database, just a static Unicode character mapping) acceptable, since it uses no external data source? We want to make sure our approach stays within the fair-play rules before we finalize our pipeline. Thank you.	https://drive.google.com/open?id=1tvWBr	Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, unoman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.
9/25/2026 15:45:04	Sachit Bansal	deliveryagents	I made a submission and it passes the official validator. this was my 2nd submission. and i know for a fact the 2 files are nearly identical. either give me my score or please kindly dont consider my submission in daily 5 submission limit and remove it. i can then try making a new submission	https://drive.google.com/open?id=1NzEX

9/25/2026 15:55:43	Sujithra R	Neural nexus	Hello, I am a student participating in the Amazon ML Challenge 2026. The challenge requires us to work with Amazon SageMaker, but when I try to access/create a SageMaker environment, I am being asked for payment or billing information. I have a valid college-issued student email ID. Could you please let me know whether there is a student verification process or any AWS credits/resources provided for challenge participants that would allow us to access SageMaker without paying personally? Also, if SageMaker access is not available to us, are participants allowed to use alternative environments such as Google Colab or Jupyter Notebook for data preprocessing, model training, and generating the final submission? Please guide us on the correct process and any restrictions regarding the environment/tools we can use for the challenge. Thank you.	https://drive.google.com/open?id=1LH1R	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.

9/25/2026 16:11:15	Akshat Jain	Gladiators	Urgent clarification regarding AWS account / $200 credits for Amazon ML Challenge 2026 Hello Amazon ML Challenge Team, I am a registered participant of Amazon ML Challenge 2026, and Stage 2 has started. I have an existing AWS account that was created before this challenge. Its AWS Free Plan has ended, and the account currently does not allow normal AWS resource access. The AWS Billing and Cost Management page shows that the account still has approximately $107.27 in active credits ($87.27 AWS Free Tier credit remaining and $20 promoti I also have my AWS Builder ID/Builder Center profile and the AWS Skill Builder subscription obtained through the challenge. I have checked the Amazon ML Challenge AWS guide and could not find any requirement stating that the AWS Management Console account must use the same email address as the AWS Builder ID. The guide also describes Builder ID and AWS account as separate credentials. I therefore need clarification on the correct procedure: 1. Is it permitted to use an AWS account registered with a different email address from my AWS Builder ID/Challenge registration email? 2. If yes, can such an account be used for the Amazon ML Challenge and receive/use the $200 AWS credits? 3. Since my existing AWS account's Free Plan has ended, should I continue with my existing account, upgrade it to a Paid Plan, or use another AWS account for the challenge? 4. I have already opened an AWS Support case regarding my suspended/closed Free Plan account, but the case is still unassigned. 5. Most importantly, please confirm whether I need AWS/SageMaker at all for submission. I noticed that responses in this Query Form state that AWS/SageMaker is encouraged but not mandatory and that teams may develop on other platforms such as Colab/Kaggle. I do not want to create an AWS account incorrectly or violate AWS account/Free Tier eligibility rules. Please advise the officially permitted procedure for my situation. Since Stage 2 is already underway, I would appreciate an urgent clarification. Thank you.	https://drive.google.com/open?id=1zrJBu	
9/25/2026 16:11:38	Aravindhan V	TechFaah	Issue: Matching Results File Upload/Submission Stuck I am participating in the Amazon ML Challenge 2026 – Business Entity Resolution Challenge. I generated the required matching_results.tsv file according to the submission format specified in the problem statement. I uploaded the matching_results.tsv file through the Upload Matching Results File section. After starting the submission/evaluation process, the page has remained stuck on "Please Wait" with progress showing 0 for more than one hour. I have already waited for more than an hour, but the evaluation has not completed and I have not received a score or success/failure message. Details: Challenge: Amazon ML Challenge 2026 Problem: Business Entity Resolution Challenge File submitted: matching_results.tsv Format: TSV Issue: Evaluation remains stuck at "Please Wait" / progress 0 Waiting time: More than 1 hour Please check whether my submission is being processed correctly or if there is an issue with the evaluation system. Since the challenge has a submission deadline, I would appreciate assistance in resolving this without losing my submission opportunity.	https://drive.google.com/open?id=1vdEaI

9/25/2026 17:10:05	Saptarshi Dutta	Chant Chamkadar	1.Does the "MIT/Apache 2.0 License, ≤8B parameters" constraint (item #5) apply only to the final matching-decision model, or to every model used anywhere in the pipeline, including blocking-stage embedding models? 2.If we run an open-weight LLM (e.g. Qwen2.5-7B-Instruct, Apache-2.0) entirely locally — weights downloaded once, inference run offline with no network calls — does that count as compliant self-hosted use, or does it fall under the "external services" prohibition in the Academic Integrity section? 3.Does hosting our own local inference server (e.g. via vLLM/Ollama) and calling it through a local API endpoint count as an "external API" under the fair-play rule, even though no data leaves our machine? We want to confirm "external" means internet-bound/third-party, not any API-shaped call.	https://drive.google.com/open?id=1NHic	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. You don't have to use a pretrained model. Classic ML models you train yourself (e.g. LightGBM, logistic regression) are fine. You can also run an allowed model on your own machine or server (e.g. through vLLM or Ollama), as long as it makes no calls to third-party or internet services.

9/25/2026 17:59:58	nakul maurya	NOX	Clarification regarding pretrained models and multi-stage candidate filtering The problem statement permits final models with up to 8 billion parameters under an MIT or Apache 2.0 license, while prohibiting external data lookup and external data augmentation. We plan to use an MIT-licensed pretrained multilingual Transformer—such as Microsoft's Multilingual MiniLM—fine-tuned exclusively on the provided training data for pairwise entity matching. The pipeline will not query external databases, APIs, business registries, geocoding services, or internet sources during training or inference. Could you please confirm: Are generic pretrained model weights allowed, provided the model satisfies the stated parameter and license restrictions and is fine-tuned only using the supplied dataset? Are pretrained tokenizers and generic pretrained language representations considered permitted model components rather than prohibited external data augmentation? In a multi-stage pipeline—broad blocking → ML-based pre-ranking/filtering → final Transformer matcher—should candidate_pairs.tsv contain: the broad candidates produced before ML pre-ranking, or only the final candidate pairs actually passed to the final Transformer matcher? If the final decision blends scores from the pre-ranking model and Transformer, should candidate_pairs.tsv contain the complete set of pairs scored by both models after deterministic blocking? Must pretrained model weights be included inside the final ZIP, or is it acceptable to specify the exact public model name, revision/commit hash, license, and reproducible download instructions? We want to ensure that the approach fully complies with the external-data prohibition and that the submitted candidate file represents the correct pipeline stage.	https://drive.google.com/open?id=1c2lkb	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. candidate_pairs.tsv is the last candidate set fed to your matching model; every ID in matching_results.tsv must appear here too.

Now I cannot update my codebase by uploading the zip file. So my humble request would be to just revert my last submissions of the final code zip file? I would be really greatful.	https://drive.google.com/open?id=1ohpGl	
9/25/2026 19:12:05	Yukta Yogendra Bhat	Team Orbit	Hello Organizing Team, I am participating in the Amazon ML Challenge 2026 as a team leader and would like to clarify a few points regarding AWS account usage and the submission process. I registered for the challenge on Unstop using yuktamaster07@gmail.com However, my SheerID student verification request is associated with masteryukta07@gmail.com . SheerID has informed me that they can review and approve the verification under the latter email, but they cannot confirm how the AWS credits or challenge access will be ass Because of this email mismatch, I would like to understand the permitted options for completing the challenge. 1. If the AWS credits are associated with the AWS account/email corresponding to my student verification, can I use my teammate's verified AWS account and resources to build/train the model, since she is a member of the same registered team? 2. If using my teammate's AWS account is not permitted, can our team **develop and train the model completely locally using VS Code/Python**, without using AWS/SageMaker, and then submit the required prediction/output CSV through the official submission process? 3. For the documentation/submission section, if local development is permitted, can we provide our source code as a ZIP file or GitHub repository link, along with the required CSV/output file and documentation explaining the approach, model, training process, and results? 4. If there is a specific required submission format or if SageMaker/AWS deployment is mandatory, could you please clarify the exact requirement?	https://drive.google.com/open?id=1E_Sz8	
9/25/2026 19:12:11	Aditya Hegde	Gradient Squad	I am unable to launch a notebook because the account-level quota "SageMaker Unified Studio Notebooks running on sc.t3.medium instances" is currently set to 0. I requested an increase of this quota to 6. My support case number is 179033417900817. The case shows as resolved, but the Applied quota is still 0 in AWS Service Quotas, and I continue to receive the error: "The account-level service limit 'SageMaker Unified Studio Notebooks running on sc.t3.medium instances' is 0 Notebooks, with current utilization of 0 Notebooks and a request delta of 1 Notebooks." This my aws builder id: @alias1aditya	https://drive.google.com/open?id=1Lwk4r	
9/25/2026 19:12:29	Raj Mathuria	Amazbtes	We have submitted our submission once, where we uploaded both matching_results & the zip file. However we have updated our code and we want to upload the updated code & we want to upload the updated code, however for the next time we are only able to upload the matching_results. Kindly provide the option to upload the zip file again as v	https://drive.google.com/open?id=14Snlb	
9/25/2026 19:12:54	Bibhu Kumar Singh	Degi Mirch ka Tadka	What I am supposed to submit, it was asked fir a zip file to submit so what are these version history	https://drive.google.com/open?id=1oi65C	
9/25/2026 19:14:00	Abhinav Garg	git push -force	All 4 of our leaderboard submissions today failed with no error message (IDs 3671515, 3671609, 3671650, 3673431; status -1, score null). For 3673431 (25 Sep, 18:19 IST), the upload is verified complete: the S3 PUT returned HTTP 200 (96,690,609 bytes, 9.7 s, screenshot attached). The file passes the official utils/validate_submission.py with --check-ids: UTF-8, tab-separated, LF line endings, no BOM, 1,732,544 rows, 5,761,220 matched IDs, all valid. We initially also hit the Windows issue where the portal sends file_type "" for .tsv files (Bad Request on create-presigned-url); we fixed that locally by registering the MIME type. Other teams on your response sheet report the same pattern (e.g. files of ~24–26 MB scored while 60–100 MB files failed), which suggests an evaluator timeout or size limit on full-size submissions. Could you please: Check the evaluator logs for these submission IDs and share the failure reason. Confirm whether there is a file size or evaluation time limit. Restore these 4 failed attempts to our daily submission count.	https://drive.google.com/open?id=1Z57xi	
9/25/2026 19:14:08	Y Mahalakshmi	Amigos	i dont see any data set to download option in unstop and i also not able to see any leaderboard	https://drive.google.com/open?id=1qZWi	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 19:14:48	K.Swetha	Bytebrains	Dataset is not available to use	https://drive.google.com/open?id=1xr1hx	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 19:16:07	Yashwanth kumar	Peak	Should I have to submit Matching results file by today or i can submit it before 27 sept 2026?	https://drive.google.com/open?id=1HTPD	No. You don't have to submit every day. Submit whenever you're ready, at any time before the challenge closes. Each submission must still cover every test Source 1 entity.
9/25/2026 19:19:02	Harsha K	NeuralAWS	My friend who is willing to participate, was unfortunately not able to join us, is there any way this person can enter as a part of our team (which has 3 members) now?	https://drive.google.com/open?id=1tZJeq	
9/25/2026 19:23:21	Pradeep Mondal	ML Challengers	Our team have participated in the ongoing Amazon ML Challenge and our team consists of all members who are doing IIT Madras's program - "BS in Data Science and Applications" graduating in 2027. But today we came across the eligibility criteria which doesn't include "BS" as the eligible degree. Are "B.S." students eligible?	https://drive.google.com/open?id=1cp0Ju	
9/25/2026 19:24:48	Divyanshu Kumar	VBV	We'd like to confirm two points about the rules before our final submission, so that our approach is fully compliant. 1. Pseudo-labeling on test data The rules say models must be trained or fine-tuned only on the provided data. Does this allow semi-supervised training that uses the unlabeled test records? Specifically: (a) we run our trained model on the provided test records, (b) we take only its own high-confidence predictions as pseudo-labels (no external data, lookups, or manual labeling), and (c) we use these pseudo-labels to further fine-tune or retrain our matching model before producing the final submission. Can you confirm that this counts as using only the provided data and is permitted? 2. Scope of the MIT/Apache-2.0 license requirement The rule states that the final model must be MIT or Apache-2.0 licensed and at most 8B parameters. Does this requirement apply only to ML models (e.g. pretrained embedding or cross-encoder models), or also to supporting open-source software libraries in the pipeline (e.g. text-normalization or transliteration packages, string-similarity libraries,	https://drive.google.com/open?id=1VXs4	Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine.
9/25/2026 19:24:52	Routhu Pavan Sai	Phoenix	I am currently enrolled at SRM University-AP, India, and I am trying to complete my student verification through AWS Builder Center for the Amazon ML Challenge 2026. I successfully completed the SheerID verification process and my student details were verified. However, after the verification is completed, AWS Builder Center still shows the optic my email is pavansai_routhu@srmap.edu.in collage id	https://drive.google.com/open?id=1ewKo	
9/25/2026 19:24:56	Christine	hackathong	Could you clarify whether the same business/entity can appear across the datasets in different languages? I'm trying to understand whether cross-language matching is required, or if the differences are only within the same language.	https://drive.google.com/open?id=1FVEA	The private leaderboard is scored on the same test files you already have. So it covers the same three countries (US, India, France), and no new countries or languages are added. The same business can appear in different scripts across sources. For example, a name may be in an Indic script in one source and in Latin script in another, so your pipeline may need to match across scripts.
9/25/2026 19:25:58	Ashwak Kattubadi	Sigmoid Squad	where can i find dataset?	https://drive.google.com/open?id=1qVPV	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 19:27:37	Varsha D Y	AlgoForge	I am the team leader so where will I find the dataset	https://drive.google.com/open?id=1yYZK	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 19:29:33	Masna Manideep	Code Blooded	can you describe some real-life scenarios where this problem occurred and faced by the users. I need upload some image for form submission. image is not related my query.	https://drive.google.com/open?id=1DCZc	
9/25/2026 19:32:04	Arnav Pravin Mhaske	Butterfly	Status code: 402 - The account-level service limit 'SageMaker Unified Studio Notebooks running on sc.t3.medium instances' is 0 Notebooks, with current utilization of 0 Notebooks and a request delta of 1 Notebooks. Please use AWS Service Quotas to request an increase for this quota. If AWS Service Quotas is not available, contact AWS support	https://drive.google.com/open?id=1yV1xl	
9/25/2026 19:32:09	Vaishali Gupta	Jeff Bezos	I have requested for quota increase, please allow it asap	https://drive.google.com/open?id=1Rfu9i	
9/25/2026 19:32:38	Pallavi Reddy Bandela	DualMinds	Where will I get dataset and where should login to submit my solution?	https://drive.google.com/open?id=1X-y0U	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.

Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
			I am facing an issue with SheerID student verification. I have uploaded my valid college fee receipt and current class timetable, but my verification is still unsuccessful, and I have now exceeded the maximum number of verification attempts.		
			I am a final-year B.E. Electronics & Telecommunication student at Thadomal Shahani Engineering College, Mumbai. The submitted documents clearly verify my current enrollment.		
9/25/2026 19:32:41	Tejaswee Premchand Raj	TWOPOINTERS	I am also the Team Lead for the Amazon ML Challenge, and this verification issue may affect my team's ability to participate and submit the challenge on time. I therefore request an urgent manual review and verification of my account. Proof of enrollment: Google Drive – Enrollment Documents Please let me know if any additional document is required.	https://drive.google.com/open?id=1Gfx_4	
9/25/2026 19:39:41	Aanya Srivastava	TechKnows	me and my team aren't able to login into aws console.... and whenever I am trying to login through captcha it is not reading that... Please help	https://drive.google.com/open?id=1LTQ3	
9/25/2026 19:44:28	Aryan shashikant yadav	hiltaxion	I am unable to submit my solution on the challenge portal. After uploading my file, the system shows an error message and rejects the submission. My code compiles successfully on my local machine, so the issue seems related to the portal environment. Please confirm if a specific configuration or version requirement is needed.	https://drive.google.com/open?id=1hDz_I	
9/25/2026 19:46:49	rithesh	M L Titans	its showing server issue from last 4 hours.its not allow mw to log in	https://drive.google.com/open?id=1oqvM	
9/25/2026 19:47:59	M praneetha	Flora	No dataset provided	https://drive.google.com/open?id=1m8ng	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 19:57:30	Sushrith Kandagatla	STR	I have a query regarding the number of submissions. Does submitting more times have any impact on our rank on the public leaderboard? According to our results we are suppose to be at 110 but it shows 150.	https://drive.google.com/open?id=1WBGz	
9/25/2026 19:58:05	Anuraag Tandon	Root_Access	In the screenshot below, it shows the following subfolders: 1) "output" folder -> containing matching_results.tsv, candidate_pairs.tsv 2) "code" folder -> containing "business_entity_resolution" folder 3) "output/" folder which contains requirements.txt 4) documentation.md but in the description below, it only says that only output, code and documentation.md should be there Could you please clarify this discrepancy? And also where exactly do we put our requirements.md?	https://drive.google.com/open?id=1VEPH	Put requirements.txt and README.md inside code/business_entity_resolution/, next to src/. The zip's top level holds only output/, code/, and your methodology document.
9/25/2026 19:59:13	Mokshith Sai	CodeWarriors	Our work is not yet completed. Do we definitely need to upload the matching results output file for today night. Can we upload tomorrow also , right? I mean , do teams need to upload ther files , even if work not completed too ?	https://drive.google.com/open?id=19qvq	No. You don't have to submit every day. Submit whenever you're ready, at any time before the challenge closes. Each submission must still cover every test Source 1 entity.
9/25/2026 19:59:17	UTTPAL KUMAR	EpochX	While setting up Amazon SageMaker for the Amazon ML Challenge 2026 on my AWS Free Tier account, I am unable to launch JupyterLab or initialize notebook spaces in both ap-south-1 and eu-north-1 regions due to account-level quota restrictions (LimitExceededError / Status code: 402). The failure occurs because default Free Tier service limits	https://drive.google.com/open?id=1FZ-3I	
9/25/2026 20:05:10	Gautam Dutta	ModelMinds	Hi, the dataset for the Amazon ML Challenge 2026 Hackathon has not been provided by the Amazon/Unstop team yet. Without the dataset, we cannot train or build the ML model. Could you please confirm when the dataset will be made available?	https://drive.google.com/open?id=1cP3N	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 20:10:21	Sourav Yadav	VIRAT	It is taking a lot time when i am trying to upload matching results file.I am tring to upload for than 1 hour but still it got stuck at 29% only. There is no issue of network .	https://drive.google.com/open?id=1HDvq	
9/25/2026 20:12:57	Kommadamaina Rohith	Team Tree	"Could you please clarify the submission requirements? Should we submit the full source code, or is a specific document required instead?" And paste any zip file	https://drive.google.com/open?id=1zDB4j	
9/25/2026 20:14:39	Malichetla Sreeyuktha	HOI	i need to setup the sage maker but unable to set it up as it is showing like i don't enough credits when i check for the credits it is showing zero but i have followed the step correctly only please look into it asap.	https://drive.google.com/open?id=1aTdU	
9/25/2026 20:18:42	Punit shah	Model-forge	We are unable to do student verification at AWS builder center	https://drive.google.com/open?id=1v_b3I	
9/25/2026 20:20:42	K S Rajeev Kasyap	EC2 Bombers	Need ml.m5.4xlarge (64GB RAM) and ml.r5.4xlarge (128GB RAM) to prevent Out-Of-Memory crashes when processing the 24-million record dataset for the Entity Resolution track	https://drive.google.com/open?id=1KWAf	
9/25/2026 20:28:44	Anshuman Singh	Sentient	My aws account is suspended , i have uploaded the required document , it might be due to mismatch between my address as i recently shifted , kindly look into it .	https://drive.google.com/open?id=1BrGR5	
9/25/2026 20:36:40	Anushka Nair	SayCheese	I am not able to use SageMaker, because every SageMaker quota on our AWS account is set to 0. AWS Account ID: 577208624721 Account email: anushka.nair2023@vitstudent.ac.in Contact: nush9271@gmail.com Region: us-east-1 Errors: Notebook instance: "ResourceLimitExceeded: 'ml.r5.2xlarge for notebook instance usage' is 0 Instances" Studio: "ResourceLimitExceeded: 'Maximum number of Studio user profiles allowed per account' is 0" Quota requests are pending as AWS Support cases 179034649400763 and 179034639100701. Please help escalate so we can run one SageMaker notebook instance (ml.r5.2xlarge or ml.m5.4xlarge). We haven't been able to submit because of this.	https://drive.google.com/open?id=1qdzS	
9/25/2026 20:43:48	Manchiganti Shanmukhi	Hope	We would like to clarify the recommended approach for collaborative coding. Is it possible for all team members to access and edit a single SageMaker notebook collaboratively using their respective accounts? If simultaneous access/editing of a single SageMaker notebook is not supported or recommended, could you please confirm whether we are allowed to use a platform such as GitHub for collaborative development? For example, we would maintain and manage our code in a private GitHub repository and then pull/clone the repository or push the f We would like to ensure that our collaboration workflow complies with the Amazon ML Challenge rules and guidelines. Could you please advise us on the officially recommended approach for team-based development and SageMaker usage? Thank you for your guidance. Regards, Shanmukhi Tripurambika Manchiganti Amazon ML Challenge 2026	https://drive.google.com/open?id=11mCT	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 20:47:06	Sanchit Bahuguna	Dominators	I had a clarification regarding the new instruction that candidate_pairs.tsv will be reviewed as part of the final ranking. The challenge information states that the Top 50 teams are selected based on the leaderboard results, while the new instruction says that candidate-generation efficiency (smaller candidate sets per Source 1 entity) will also be considered when deciding final rankings. Could you please clarify: 1. Is candidate_pairs.tsv considered only when ranking/reviewing teams AFTER the Top 50 have been determined by the leaderboard OR can candidate-set size also affect which teams qualify for the Top 50? 2. Is candidate_pairs.tsv evaluated quantitatively using a particular trade-off between blocking recall and candidate-set size, or is it primarily reviewed qualitatively as part of the final solution audit?	https://drive.google.com/open?id=10R5q	Per the challenge update, we review candidate_pairs.tsv and the code that produces it when deciding final rankings, alongside your matching_results.tsv score. Approaches that generate a smaller candidate set per Source 1 entity will be ranked higher, beyond the public/private leaderboard. candidate_pairs.tsv should hold the final candidate set actually fed to your matching model; a pruned later stage is fine. Every matched ID must appear in it.
9/25/2026 20:49:46	varsha jaiswal	X-Bit	i setup the aws login and verification of student id 2 days before starting of challenge , but my aws console is still not get activated, since the datadets are to long i face issues to work o my prsonal workspace , so pls clear the registration asap.	https://drive.google.com/open?id=1dkyvC	
9/25/2026 20:53:12	Shubhangi Prasad	CloudSync	I am requesting an increase for the quota "SageMaker Unified Studio Notebooks running on sc.t3.medium instances" in the eu-north-1 region. My current limit is 0, and I am requesting a new limit of 6 so I can launch a notebook. The error I receive is: "Status code: 402 - The account-level service limit ... is 0 Notebooks".	https://drive.google.com/open?id=102uH	
9/25/2026 20:56:59	Harsh Dinesh Maghnani	God's Plan	I need ml.g5.16xlarge for notebook instance usage increased from 0 to 1 in us-east-1. I have already submitted the quota increase request through Service Quotas. I need to launch a SageMaker notebook urgently. Could you please review and apply the quota increase as soon as possible?	https://drive.google.com/open?id=1_LoK9	
9/25/2026 20:58:04	Adwaith R Nair	Vyapti	How is the candidate set size weighed in the final ranking (average candidates per S1, reduction ratio, a hard cap)? Is a second-stage pruned set (cheap blocking, then a first-stage model filter) acceptable as candidate_pairs.tsv, provided every matched ID is in it?	https://drive.google.com/open?id=1R67h	Per the challenge update, we review candidate_pairs.tsv and the code that produces it when deciding final rankings, alongside your matching_results.tsv score. Approaches that generate a smaller candidate set per Source 1 entity will be ranked higher, beyond the public/private leaderboard. candidate_pairs.tsv should hold the final candidate set actually fed to your matching model; a pruned later stage is fine. Every matched ID must appear in it.
9/25/2026 21:07:43	Mohammed Noufal V	ImpactMinds	Need to know where leaderboard located sir	https://drive.google.com/open?id=1tHHz	
9/25/2026 21:07:50	V. Pragnya Reddy	YugTech	The aws platform is asking for autopay. How should we do the project?	https://drive.google.com/open?id=1vBrH(	
9/25/2026 21:09:38	Mahima Talluri	Team Athena	I got the free tier and got the credits as well. i also opened the studio and it got launced but i was not there immediately i dont know what happened next, i have to create another one, if i do i cannot find the domain, for the one i already have, the domain is there, but it says no users found, so i am not able to access the studio or start working.	https://drive.google.com/open?id=1Lkzzf1	
9/25/2026 21:16:43	Pranjal Yadav	Git Smasher	Dataset link is not provided in the problem statement pdf6	https://drive.google.com/open?id=1-qtvB/	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 21:17:22	Aastha	Neverland	Where do I find the dataset that is supposed to be used for the challenge? As I am not able to find it anywhere in the problem statement or guidelines	https://drive.google.com/open?id=11w6z	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 21:20:32	Praveen Pandey	Git Smasher	I am unable to locate/access the dataset for the Amazon ML Challenge 2026 (Business Entity Resolution Challenge). I have logged into Unstop with my registered account but cannot find a download link for the dataset files (train_source1.tsv, train_source2.tsv, train_source3.tsv, train_ground_truth.tsv, test_source1.tsv, test_source2.tsv, test_sourc Could you please confirm: Where exactly on the platform the dataset is meant to be accessed from (which tab/section)? Whether dataset access is restricted to only the registered team leader, and if so, how a team member can confirm who that is for our team? If there is a separate email communication with the dataset link, please resend it to my registered email, as I have not received/located it.	https://drive.google.com/open?id=1khj7A	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 21:21:08	Imon Mallik	Gradient Syndicate	Can we Use Hugging face fodels for language translation?	https://drive.google.com/open?id=1KhI3F	Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, uroman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.
9/25/2026 21:28:49	Gathik Jindal	Mommy's Good Boys	Need 16 vCPUs to run models	https://drive.google.com/open?id=12xFq	
9/25/2026 21:30:05	Pranav Pote	SecuriTeamX	I did not get $200 of AWS and also how to redeem it??	https://drive.google.com/open?id=1_ZF1f	
9/25/2026 21:37:01	Stavan Desai	FlowState	We want to make sure our approach follows the fair-play rules. We use no external data, APIs or lookups. We only have questions about how the provided test files may be used: Unsupervised statistics from test inputs: our pipeline computes statistics such as word frequencies (IDF), character n-gram weights and a vocabulary from the test records' names and addresses, to build candidate pairs and features. No labels are involved. We assume this is allowed. Can you confirm? Self-training / pseudo-labelling: is it allowed to take our own model's high-confidence predictions on the test set as provisional labels and retrain the model with them (for example, to adapt to France, which has no training labels)? Only the provided train/test files and our own predictions would be used, no external data. Hand-written normalization rules: are generic hand-written lists allowed in preprocessing, such as street-type abbreviations (Rue/R, Boulevard/Bd) and legal-form lists (SARL, SAS, LLC, Pvt Ltd)? They're general language conventions, not lookups of specific businesses.	https://drive.google.com/open?id=1ZxUM	Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine. The packages shouldn't inject external data. Prohibited: external databases, APIs, geocoding/entity lookup, internet-sourced augmentation, and packages bundling external geo/postal/business data (e.g. libpostal, geocoders, postal-code or gazetteer datasets, large static country/state/city tables). Allowed: pure-algorithm libraries (e.g. RapidFuzz, jellyfish, scikit-learn, pandas), general-language pretrained NLP/embedding models within the limits (e.g. fastText, wordfreq fine), any algorithm using only the provided records, and small hand-written normalization dictionaries.
9/25/2026 21:43:40	Dipesh Yadav	Cloud Ninjas	My submission failed due to a technical/upload issue. I was required to upload 5 files, but the system only provides 5 upload slots, and one of the required files was missed during the upload process. Since the submission attempt has already been marked as failed, please provide an option to re-upload the missing file or add another upload to the same submission, rather than requiring me to lose the submission attempt.	https://drive.google.com/open?id=13.lxto	
9/25/2026 21:44:44	Nitya Prasad	temp -> next	I have successfully submitted previous attempts, and this appears to be an issue with the upload process. Kindly allow me to upload the missing file and re-evaluate the submission. Query 1 — Model license/size constraint scope The problem statement states: "Final model should be a MIT/Apache 2.0 License model and up to 8 Billion parameters." Could you clarify the scope of this constraint? Most entity-resolution pipelines are built on traditional ML (feature engineering + gradient boosting/logistic regression) rather than a licensed foundation model. Does this constraint Query 2 — Pretrained embedding models vs. the external-lookup ban The rules prohibit "external databases, APIs, or services to look up business identities or resolve entities," including geocoding APIs and external data augmentation. Could you confirm whether using an open-source pretrained language/embedding model (e.g., a sentence-transformer or small BERT variant) purely to compute text similarity features Query 3 — Leaderboard submission limits Is there a cap on how many times we can upload matching_results.tsv to the leaderboard per day during the 72-hour window? Query 4 — Tie-break rule for final rankings If two or more teams end up with the same F_0.5 score on the private leaderboard, what tie-breaking criteria will decide the final ranking?	https://drive.google.com/open?id=1_zOt-I	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed. You don't have to use a pretrained model. Classic ML models you train yourself (e.g. LightGBM, logistic regression) are fine. You can also run an allowed model on your own machine or server (e.g. through vLLM or Ollama), as long as it makes no calls to third-party or internet services.
9/25/2026 22:06:44	K.Krishna Priyanka	Hope	do we need to definitely use aws services like Sagemaker and S3 for this ML challenge because when creating aws account in step 3 for payment its asking min amount of balance need to be 15000 as we are students we may not have that amount ,so is it ok to use jupyter notebook directly	https://drive.google.com/open?id=18LR5	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 22:10:08	Harsh Kumar	Mythos	The submission package i.e the ZIP file of our code was supposed to be upload at final time only? I mistakenly upload it at very 1st trial of my code with lots of bugs and inaccuracy. What to do now?	https://drive.google.com/open?id=1B6m9	
9/25/2026 22:12:18	Sidharth Swain	MindMesh	I am having trouble connecting to my notebook after working for almost 1 hour, i want to know whether the issue is with my side or the server side (EU-NORTH-1) VPN is not being used	https://drive.google.com/open?id=1SGGE	
9/25/2026 22:15:23	Dipayan Mandal	Greedy Algo	Can't find the dataset, can you please help me finding the dataset?	https://drive.google.com/open?id=1vlfO9	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 22:15:26	Vani Patel	XYZ	The test data given has countries: French, usa, India. Will the final evaluation dataset also have these three or might contain other countries too?	https://drive.google.com/open?id=1DFUb	The private leaderboard is scored on the same test files you already have. So it covers the same three countries (US, India, France), and no new countries or languages are added. The same business can appear in different scripts across sources. For example, a name may be in an Indic script in one source and in Latin script in another, so your pipeline may need to match across scripts.

9/25/2026 22:53:57	Haseeb Ahmed	CalmTone	Where do we find the dataset for training?	https://drive.google.com/open?id=1x7e7f	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 23:07:07	Govind Sannith Reddy	Spirit	Hello Team, I am participating in Amazon ML Challenge 2026. My AWS SageMaker quota request for one ml.m5.2xlarge JupyterLab instance is pending, and my currently available instance has only 4 GB RAM. Does the hackathon provide AWS credits, compute access, or assistance with quota approvals? Can we use another cloud platform for training and inference while following the challenge's data and model restrictions? AWS Support case: 179035288000203 Region: Europe (Stockholm), eu-north-1 Please advise on the available options before the submission deadline. Thank you.	https://drive.google.com/open?id=1cZ0lT	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/25/2026 23:12:32	Alan Geo Mathew	Lion King Team	Subject: Request for Team Leader Change Our current team leader is not responding to our team members and is not actively participating in the Amazon ML Challenge. Because of this, we are facing difficulties coordinating the team and proceeding with the challenge. We would like to request the Amazon ML Challenge support team to review this issue and let us know whether the current team leader can be changed. If permitted, we would like to assign another active team member as the team leader. Please let us know the procedure or any additional information required from our side. We are willing to provide the necessary details or confirmation from the team members.	https://drive.google.com/open?id=19V6C	
9/25/2026 23:14:26	Neha Bhagwat	GMNR	In the rules given in the screenshot, it is mentioned that external lookups are not allowed. I wanted to ask if we can use Cleanco, a Python library that helps in data cleaning. It doesnt require internet access and it is not used for data augmentation, but I wanted to confirm once whether it is a python library that we are allowed to use for normalizatio	https://drive.google.com/open?id=1VOUQ	cleanco is not allowed, because it brings in external information: a built-in database of legal-entity terms across 70 countries, plus country-of-registration inference. A small hand-written list of legal suffixes (e.g. Pvt Ltd, LLC, SARL) is fine.
9/25/2026 23:21:09	DHARSHENI K	Beyond Binary	I am participating in the ML Challenge	72-Hour Hackathon and need to submit my matching_results.tsv file as part of the final submission. On the submission page, under "Upload Matching Results File", I click the "upload file" button, but the file selection window does not open. Nothing happens after clicking the button, so I am unable to select or upload my matching_results.tsv file. Steps followed: Opened the ML Challenge submission page. Went to the Upload Matching Results File section. Clicked the "upload file" button. The file picker does not open. There is no visible error message. I have attached a screenshot showing the issue. Please help me resolve this so I can upload my required matching_results.tsv file before the submission deadline.	https://drive.google.com/open?id=1mGkr	
9/25/2026 23:23:17	manush basappa angadi	CalmTone	Could you please clarify why the assessment is proctored, what specific restrictions apply (such as switching tabs or using local IDEs for coding), and whether team members can collaborate off-platform once the dataset is downloaded? the Dataset won't be available till it starts. what are the violations?	https://drive.google.com/open?id=1aFYEk	
9/25/2026 23:34:34	MOOGI PRASAD	POWER PUFF PEEPS	Subject: Request for review/extension of unused AWS promotional credits Hello AWS Support, I received $100 in AWS promotional credits on September 9, 2026. The credit details currently show: - Credit type: Promotion - Issued credit amount: USD 100.00 - Amount remaining: USD 100.00 - Start date: September 9, 2026 - Expiration date: September 25, 2026 - Current status: Expired The credits have not been used at all. We are a student team working on an Amazon ML Challenge project involving large-scale data preparation and entity-resolution experimentation. We were in the process of configuring our AWS environment and team IAM access, but the credit expired before we could begin the required computation. Could you please review the account and let us know whether the unused promotional credit can be reinstated or its expiration extended as a one-time exception? We would greatly appreciate any assistance available. I can provide the credit details and screenshots if required. Thank you.	https://drive.google.com/open?id=1UYhQ	
9/25/2026 23:38:21	Avani A	Cloud Sync	I have requested for quota increase for Amazon DataZone service, Quota name: SageMaker Unified Studio Notebooks running on sc.t3.medium instances. How long will it take to be approved?	https://drive.google.com/open?id=16TNiI	
9/25/2026 23:40:30	Shaurya Aggarwal	Nexus	When trying to use the notebooks in the Amazon Sagemaker Service, it says 0 notebooks corresponding to the sub service whose quota needs to be requested to increase, but when we go to the amazon services section then there is no such sub service listed under Sagemaker. Hence we are not able to use notebook feature as shown in the tutori	https://drive.google.com/open?id=1MqnQ	
9/25/2026 23:44:52	Roshni Birla	Code Novas	From where can the leader acces the dataset requied for the problem statement	https://drive.google.com/open?id=1u7fsZr	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/25/2026 23:45:19	Govardhan satya gadi	KITKaT	Is normalizing text and computing derived features from the test source files, without modifying the raw files, permitted?	https://drive.google.com/open?id=1aHMu	Yes. Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training and synthetic pairs from the provided records are also fine.
9/25/2026 23:45:57	Tejaskumar Reddy J	Pindesh gang	We have already submitted our solution and received the evaluated results, but we are unsure about our leaderboard status. The portal mentions submitting a complete ZIP with the ML approach document and source code, but during submission, it only accepted the TSV file. Could you please clarify whether our submission will still be considered for the leaderboard, and how we can submit the remaining required artefacts if needed?	https://drive.google.com/open?id=1fDhR	
9/25/2026 23:52:39	shaik mohammad sajjad	LexCore	I registered for the challenge through my Unstop account using my email (sajjad102005@gmail.com). However, I have not received all the reward credits in my AWS Builder account. My Builder account is linked to my college email because it required verification, and I provided that email/account link while regis Could you please clarify whether the reward credits are awarded to all team members individually or only to the team leader? Also, if all members are eligible, when can we expect the credits to be reflected in our Builder accounts?	https://drive.google.com/open?id=1JyCiZ	
9/25/2026 23:52:48	NITHESH	orvix	I accidentally selected AWS instead of my actual college in my registration. My teammates have entered their college details correctly. Please help me correct only my Organization/College field to Bannari Amman Institute of Technology, Sathyamangalam	https://drive.google.com/open?id=1E12ai	
9/25/2026 23:55:22	Chittimilla Manoj Babu	SVM productions	I downloaded the provided dataset for the Business Entity Resolution Challenge. The package contains train_source1.tsv, train_source3.tsv, train_ground_truth.tsv, test_source1.tsv, and test_source2.tsv, but train_source2.tsv and test_source3.tsv are absent. Could you please confirm whether these files are intentionally omitted or provide the comp	https://drive.google.com/open?id=1j5NW	The dataset has 7 files: train_source1.tsv, train_source2.tsv, train_source3.tsv, and train_ground_truth.tsv in dataset/train/, plus test_source1.tsv, test_source2.tsv, and test_source3.tsv in dataset/test/. Together they are about 2.5 GB. If any file is missing, the download or extraction was probably incomplete. Download the dataset again and extract the full archive.
9/25/2026 23:56:13	Shiva Singh	LexCore	My student verification not done and he show your are not eligible and show error but it's wrong I enter all the correct information but he show not eligible and my other my teammates are eligible with the same information	https://drive.google.com/open?id=1bqBR	
9/25/2026 23:57:40	JD Shalini	Galaxy	In the upload page, it says to upload only the matching_results.tsv file. But in the email received, it says candidate_pairs.tsv is also important. Please explain what exactly has to be done	https://drive.google.com/open?id=1T7iOF	
9/26/2026 0:05:32	Shivam Kumar	ELECTRONERDS	Was there free creds for the event?	https://drive.google.com/open?id=1KpKx	
9/26/2026 0:06:27	Abhyuday Kashyap	Team Basic	I made 5 submissions on 25th, it is 26th now but I can't make any furtghur submission, whereas the doc clearly says that 5 submissions per day is allowed, but I can't make any submission.	https://drive.google.com/open?id=1hM_I7	
9/26/2026 0:12:24	SHEELA AKSHAR SAKHI	EDITH	I am facing an issue with the submission portal for the Amazon ML Challenge 2026. I have made 5 submissions so far. After 12:00 AM, I expected the submission limit to reset, but the "Upload File" and "Submit & Evaluate" buttons are still disabled/greyed out, so I am unable to upload a new matching_results.tsv submission. Please confirm the submission limit for the challenge, when the submission quota resets, and whether my team has reached its submission limit. If I am eligible to make another submission, please help restore access to the upload option. I have attached a screenshot showing that the upload and submit buttons are disabled.	https://drive.google.com/open?id=1RRXR

9/26/2026 0:18:20	Manav Jobanputra	Crewmate	we have exhausted 5 submission in a day and its 12:20 and still not get new 5 of this day resolve this	https://drive.google.com/open?id=1WqtR	
9/26/2026 0:22:05	Varad Kulkarni	Terabyte	WHEN REQUESTED FOR QUOTA INCREASE, THEN AMAZON(AWS) IS NOT ACCEPTING THE REQUEST ! PLEASE REVIEW IT!	https://drive.google.com/open?id=1Per0Z	
9/26/2026 0:24:32	Shourya Banda	Sonder AI	I uploaded the 5 submissions for yesterday , it's past 12 on 26th September I'm not able to submit more submissions ??	https://drive.google.com/open?id=1SDNC	
9/26/2026 0:27:12	Rishi Popawala	Visionaries	For the Amazon ML Challenge 2026, the rules state each team gets 5 submissions per day for 3 days. Could you confirm the exact time the daily submission count resets (e.g., 12:00 AM IST) or it's a rolling 24-hour window from our first submission?	https://drive.google.com/open?id=1rx61U	
9/26/2026 0:31:40	Bhavya Talwar	Aspiring Alphas	I am unable to submit new submissions (matching_results file) even though the 2nd day has been started.	https://drive.google.com/open?id=1wAvH	
9/26/2026 0:41:52	NITHYA PRAKASH K	NITHYA PRAKASH K	Our project team is working on the Business Entity Resolution Challenge to resolve multi-source commercial data. We are structuring our pipeline to implement a scalable TF-IDF character 3-gram blocking strategy to reduce the computational candidate space. This candidate set will feed a tuned machine learning model that extracts string similari	https://drive.google.com/open?id=12NMI	Your approach is allowed as long as it uses only the provided data. Tips from the problem statement: invest in strong blocking, since it caps your recall. Use string-similarity features (Jaccard, Levenshtein, TF-IDF cosine). Tune for precision, because F0.5 penalizes false merges. Don't neglect singletons: an empty prediction scores 1.0 on an entity with no true match. Keep your blocking lean, because fewer comparisons are encouraged: approaches that generate a smaller candidate set per Source 1 entity will be ranked higher in the final evaluation.
9/26/2026 0:42:52	Aditya Onam	01BIT	I have exhausted all 5 submissions on day 1. The day has changed but still I do not find the upload button available.	https://drive.google.com/open?id=19uOP	
9/26/2026 0:47:54	Sahil Pandey	The Eigens	Can we use state names or shortforms of state names by hardcoding them for US and India or will it come under the external dataset clause?	https://drive.google.com/open?id=1v0Di	A small hand-written list of state names and their abbreviations (e.g. TX = Texas, MH = Maharashtra) is fine. City-level or postal tables are not.
9/26/2026 0:54:20	pramod sai tarva	BugBusters404	When does the 5-per-day submission limit reset (IST midnight, UTC midnight, or rolling 24 h)?	https://drive.google.com/open?id=1EispC	
9/26/2026 0:55:04	Daram Vishnuvardhan	Grinders	my upload submission button is not enabled please help me	https://drive.google.com/open?id=109Mi	
9/26/2026 1:04:42	komminenj yashaswini	SparseMatrix	I cannot see my ranking and the ranking of my team is not updated . there are many team with 0 score and i canot see my ranking and score in the leadership board. i hope you look into this matter soon .	https://drive.google.com/open?id=1ZVy7	
9/26/2026 1:05:11	Anshul Khaire	The Burners	on 25th Sept we evaulated 5 results. its 26th Sept 1.04 AM now still we are not able to submit our improved model.	https://drive.google.com/open?id=1cfLlu	
9/26/2026 1:14:15	Riddhi Chatterjee	GMNR	Are we allowed to use IndicXLit for transliteration in EDA? It's a pretrained model	https://drive.google.com/open?id=1Bfp9	Offline, rule-based text libraries are allowed if they run locally and bundle no geo/postal/business data. Examples: transliteration (indic-transliteration, anyascii, uroman), Unicode cleanup (ftfy, unicodedata2), and string distance (textdistance). Your own rule-based transliteration code is fine too. Pretrained translation or transliteration models (e.g. IndicXlit) are allowed within the model limits: MIT/Apache-2.0, up to 8B, run offline. Online translation services and APIs (e.g. Google Translate, AWS Translate) are not allowed.
9/26/2026 1:19:29	Sai Varshith Paluru	Project Mayhem	It's 1:17AM currently on the 26th, so the 5 submissions per day limit should've already been reset, and yet the file upload button is still disabled	https://drive.google.com/open?id=1TaNS	
9/26/2026 1:24:34	Vinay Khedkar	Tripsy	On unstop i see an option to start the assessment but im still now ready to start the assessment so where to access the dataset and all? like im not sure if it i need to sit the whole 2days from now on or what is the format???? the instructions on unstopp are not at all clear	https://drive.google.com/open?id=12OLC	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/26/2026 1:29:05	Kamlesh TJ	Status_Code_401	the free ml.t3.medium isnt enough for my model, so I raised request for an ml.g5.2xlarge and ml.c5.2xlarge instance. I have already connected my billing account and have 120 USD credits. Please approve it ASAP so that I can start training my model fast. I'm unable to train my model anywhere else like kaggle and colab because of their runtime lir Please consider my request and grant me access for these endpoints at the earliest.	https://drive.google.com/open?id=1DqTs	
9/26/2026 1:33:12	sanskar singh	TeamTech	my jupyter Lab notebook is not working. showing server error with sagemakerAI and notebook instances.	https://drive.google.com/open?id=1QuTS	

Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
9/26/2026 1:35:28	Vinay Singh	AimBot	Hi, could you please clarify whether we are allowed to use pretrained multilingual models (e.g., LaBSE or IndicBERT) downloaded and run locally, without calling any external APIs/services during inference or using external data for augmentation/entity resolution?	https://drive.google.com/open?id=1aexzr	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/26/2026 1:36:12	v sai jashwanth	Minus Zero	I was unable to create an AWS Builder account using my current Gmail account, so due to the limited time remaining before the deadline, I created the AWS Builder account using another Gmail account jashuveerlapati@gmail.com.does it incase violate the guidlines or not?	https://drive.google.com/open?id=1hG_i6	
9/26/2026 1:37:14	suman patari	Fuzion	I have doubt about the final submission, here currently in the upload section its showing to upload matching-result.tsv file , so where we have to submit the final zip file that will contain candidate_pairs.tsv , code , src . do we upload in this section only?	https://drive.google.com/open?id=1q3aal	
9/26/2026 1:40:42	Sai Ved	Indians	I need 16vcpu for VM , but it's asking for quota approval which is by default set to 0 and it takes days or hours to approve it.	https://drive.google.com/open?id=1SKK7	
9/26/2026 1:41:28	Viraj Singh	The Potato Gang	Can't upload more submissions. its disabled. we haven't used any submission on the new day.	https://drive.google.com/open?id=1QrsiV

The submit button has been unavailable since around 05:00 IST on 26 Sep. Our team made 5 submissions: 25 Sep 23:32 and 23:41 IST, and 26 Sep 01:33, 01:	https://drive.google.com/open?id=1_GDtl	
9/26/2026 6:17:38	Shaik Arifa	TriTech	Hello Amazon ML Challenge Team, I am the Team Leader of our team. I can see the option to upload `matching_results.tsv` on the Unstop leaderboard, but I cannot find where to submit the required final ZIP file. Could you please clarify where the final ZIP file should be submitted? Thank you.	https://drive.google.com/open?id=1eNiW	
9/26/2026 6:24:06	Yash Kumar Vaibhav	GitBoosters	I am facing an issue with the submission portal for the Amazon ML Challenge 2026. Team Name: GitBoosters Registered Email: yashkumarvaibhav.official@gmail.com We used all 5 submission attempts available yesterday. However, I have not made any submission today, and the portal is still showing the following error: "Limit to submit in this round has exceeded." The Upload File button is also disabled. I also noticed that whenever I reload the page, the Upload File button becomes enabled for around half a second. I tried clicking it during that brief period, but the portal immediately showed the same submission-limit error. As per the challenge rules, 5 submissions per day are allowed. Therefore, it appears that our daily submission quota has not been reset for today. Could you please check the submission count for Team GitBoosters and restore/reset today's submission slots at the earliest? Since this is a time-bound challenge, the issue is preventing us from evaluating further iterations of our solution. I have attached screenshots showing the issue. Thank you for your support.	https://drive.google.com/open?id=1yZvNl	
9/26/2026 6:52:02	Harjit Singh	Future Amazon Employee	I didn't get Amazon AWS Credits , please issue the credits	https://drive.google.com/open?id=1MF9r

9/26/2026 7:09:58	Subhadeep Roy	Shadow Protocol	Subject: Amazon ML Challenge 2026: submission upload blocked (per-round vs per-day limit) Hello, our team Shadow Protocol (team ID 58895643) made 5 submissions on 25 Sep. Since then the "Upload Matching Results File" button is disabled on 26 Sep (checked at 03:10 and 07:04 IST). The guidelines state "a maximum of 5 submissions per day for over 3 days", but the portal configuration shows allowed_submission_per_round: 5, so tl	https://drive.google.com/open?id=1IBE1C	
9/26/2026 7:18:35	Vansh Gupta	LocalMinima	I am not able to submit my files for further evalutation	https://drive.google.com/open?id=1z7gW	
9/26/2026 7:39:53	Baalaje Athappan S	Cipher craft	Well for now i have a md file that i created using the sample data set you gave but i don't how to access the original data set	https://drive.google.com/open?id=1A7VN	The dataset is on the Unstop portal and is visible only to the Team Leader's account. Once the Team Leader "Starts" the competition, open the Problem Statement section and use "Download Dataset" to get all train/test .tsv files. It is not in the email or the PDF.
9/26/2026 7:42:32	Kanika AB	Nexora	Am I allowed to switch between browser tabs during the assessment, or will it trigger a warning?Can I use VS Code, Jupyter Notebook, or Google Colab to write and run my code and access documentation or other websites during the assessment?	https://drive.google.com/open?id=1bXYU	Using AWS/SageMaker is encouraged but not mandatory. You may develop on other platforms of your choice. You are judged on your results and reproducible code, wherever you run it; the $200 AWS credits are there to help you run on AWS if you choose.
9/26/2026 7:44:17	Soham Gaonkar	neuron	The "Submit & Evaluate" button (and the "upload file" button) on our submission page is disabled, even though we haven't reached the daily limit for today. The guidelines say each team can make a maximum of 5 submissions per day. Our submission history shows: 25 Sep 2026: 4 submissions (4:26 PM, 4:28 PM, 7:10 PM, 7:53 PM IST) 26 Sep 2026: 1 submission (6:24 AM IST) So we have made only 1 submission on 26 Sep, but the submit option was already disabled at around 7:30 AM IST on 26 Sep. Steps tried: refreshed the page, cleared the browser cache, and tried incognito mode. The button stays disabled. No error message is shown; both buttons are just greyed out. Could you please clarify whether the 5-submission limit is per calendar day (IST) or a rolling 24-hour window, and check whether our submission access is working correctly? Screenshots of the submission history and the disabled button are available if needed.	https://drive.google.com/open?id=1TOtJv	
9/26/2026 7:44:34	Mudit Kumar	MoonWalkers	I am unable to submit my matching_results.tsv file on the challenge portal. The submission screen gets stuck on "Please Wait" with the counter at 0 and remains there for a very long time without completing the upload or showing any error message. Details: File name: matching_results.tsv File size: approximately 88 MB Number of required Source 1 rows: 1,732,544 The file has been validated using the official utils/validate_submission.py script. I also re-ran the validator with the --check-ids option. Both validations returned: PASS — no blocking issues found. Safe to submit. I have already tried waiting for several hours, refreshing/relogging into the portal, and retrying the submission, but the issue persists. Please check whether there is any issue with the submission portal, upload size limit, or my account/session. I can also provide screenshots of the stuck submission screen and the successful validator output if required. I would appreciate your help in resolving this as soon as possible so that I can submit before the challenge deadline.	https://drive.google.com/open?id=1_RNq	
9/26/2026 7:57:36	Om Tilwar	YOU_WIN_I_LOSE	i have done 2 submissions on day 1 and on day 2 when i did 3 submission consecutively then the submission button is not allowing me to do 2 more submission as per daily limit help us with this as the issue is costing us time and also we are not able to improve our model as the further improvement depends upon the upcoming submission scon	https://drive.google.com/open?id=1oKc1J	
9/26/2026 8:21:50	Rajat Niteen Raghatwan	Utkarsh Minds	Hello, Our team made 5 submissions at these times (IST): 25 Sep, 06:09 PM 25 Sep, 07:21 PM 25 Sep, 07:43 PM 25 Sep, 10:40 PM 26 Sep, 12:33 AM It is now 26 Sep, 08:15 AM IST, and the upload option is still disabled for us. Since our last submission was after midnight on 26 Sep, we expected to have submissions available today. Could you please clarify: 1.Is the limit of 5 submissions counted per calendar day (IST midnight to midnight), per UTC day, or as a rolling 24-hour window from each submission? 2.When will our upload option be enabled again?	https://drive.google.com/open?id=1N_nbj	
9/26/2026 8:26:10	PRASUN BARANWAL	Flaming Phoenix	though the limit is 5 max per day, the button is disabled still and not been refreshed till morning day2, i am also attatching screenshot, 5 submissions it only took for evaluation yesterday but today button itself is blocked and quota of 5 not givne for today.	https://drive.google.com/open?id=1KscXi	
9/26/2026 8:42:11	Soumy Dhiran	Lakshya	On day 1 I have completed my daily 5 Submision quota but on 2 nd day I am not able to submit any file but as you have mentioned "Each team can make a maximum of 5 submissions per day for over 3 days of the hackathon, after which the submit button will be disabled." I want to know why it is not working or there is error from your side ?	https://drive.google.com/open?id=1mWM	
9/26/2026 8:42:26	caviraj n	brain stromers	Hello AWS Support, I am using an AWS Student/Learner account and trying to create a SageMaker Studio user profile in my SageMaker domain. The domain was created successfully, but user profile creation fails with the following errors: ResourceLimitExceeded: "Maximum number of Studio user profiles allowed per account is 0 UserProfiles, with current utilization of 0 UserProfiles and a request delta of 1 UserProfiles." UnrecognizedClientException: "The security token included in the request is invalid." Because the SageMaker Studio user profile quota is set to 0, I am unable to create any user profile or access SageMaker Studio. I need SageMaker Studio for my academic project work. Could you please verify whether SageMaker Studio is supported for my account and, if possible, increase the user profile quota or enable the required permissions Thank you.	https://drive.google.com/open?id=1VdNE	
9/26/2026 8:46:23	Roshan T	Nooglers	The submission button has been disabled for the second day. Please look into this issue as soon as possible, as it is affecting our ability to participate and undermining the significant effort we have put into the challenge.	https://drive.google.com/open?id=1ENbH	
9/26/2026 8:50:17	Pranav Singh	amazoners	Our team made 5 submissions yesterday. Since the hackathon is a continuous 72-hour event and the rules state a maximum of 5 submissions per day for 3 days, we should have a fresh submission quota today. However, the "Upload file" button is disabled. Could you please check our team's submission status?	https://drive.google.com/open?id=1ASpR	
9/26/2026 8:53:46	kali bhanushali	de beggers	Can we use a local, offline, MIT/Apache-licensed pretrained embedding model (e.g. sentence-transformers) as a feature extractor, with no external API calls or internet lookups at inference time?	https://drive.google.com/open?id=1mTDu	Pretrained open-weight models are allowed if MIT/Apache-2.0 licensed, up to 8B params, run offline, and fine-tuned only on the provided data. The 8B/license limit is per model and applies to every model you use, so each one (embedder, reranker, matcher, and any preprocessing/augmentation model) must independently be MIT/Apache-2.0 and up to 8B; a preprocessing-only model counts and its license is checked. Hosted LLM APIs (Claude/Gemini/ChatGPT) are not allowed.
9/26/2026 8:53:53	Mayank Kumar	Dora	Our team (Dora, team lead Mayank Kumar, IIIT Una) is unable to upload a new matching_results.tsv on the challenge page: the "upload file" button is greyed out and no error message is shown. We made 5 submissions yesterday (25 Sep, between 6:03 PM and 11:11 PM IST), so we assume the daily limit applies. Could you please confirm: Whether the limit of 5 submissions per day resets at a fixed time (which one, IST?) or on a rolling 24-hour basis. Whether there is any other reason the upload button could be disabled for our team. The file itself is a standard tab-separated matching_results.tsv (about 93 MB), same format as our earlier accepted submissions.	https://drive.google.com/open?id=1_Hsm	
9/26/2026 8:55:03	Anant Rajput	CISTUP	though the limit is 5 max per day, the button is disabled still and not been refreshed till morning day2, 5 submissions it only took for evaluation yesterday but today button itself is blocked and quota of 5 not given for today.	https://drive.google.com/open?id=1_RIht

9/26/2026 12:53:26	Ridhi Jaggi	Tensor Queens	Dear AWS Support Team, We are participating in an ML challenge and are currently unable to run our workload because the account-level SageMaker quota for the following notebook instance type is set to 0: Current quota: 0 instances Requested quota: 1 instance We require notebook instance for each of the following two AWS accounts: 1. aishwarya002mtaids26@iigdtuw.ac.in Existing Support Case ID: 179040654900435 Subject: Quota Increase: SageMaker Endpoints Category: Service Limit Increase, SageMaker Endpoints 2. jaggiridhi3012@gmail.com Existing Support Case ID: 179040459000046 Subject: Quota Increase: SageMaker Endpoints Category: Service Limit Increase, SageMaker Endpoints The current quota of 0 prevents us from launching the required ml.r5.4xlarge SageMaker notebook instance, which is necessary for running our ML challenge workload. We therefore kindly request that the ml.r5.4xlarge for notebook instance usage quota be increased from 0 to 1 for both accounts. We would greatly appreciate it if these quota increases could be reviewed and processed at the earliest possible opportunity, as the current limit is preventing us from running our workload. Please let us know if you require any additional information, account verification, or details regarding the ML challenge. Thank you for your assistance.	https://drive.google.com/open?id=1mHuj	
9/26/2026 12:56:36	Udita Uniyal	Code X	Hi team, we have four quick rule clarifications so our final submission stays compliant. 1. Test-set statistics: Can our pipeline compute unsupervised statistics on the test files at inference time, such as token frequencies, IDF weights or a vocabulary? No labels and no external data would be used. Or must every fitted statistic come from the training data only? Is self-training on our own test predictions allowed? 2. Private leaderboard: Which of our submissions is scored on the private leaderboard: the best public score, the latest upload, or one we select? 3. Candidate set size: The update says a smaller candidate set per Source 1 entity ranks higher. How is size measured (average candidates per Source 1 entity, or total pairs)? Is recall of the candidate set considered too? And how much does it weigh against the F0.5 score? 4. Normalisation lists: Can we use short hand-typed lists for text normalisation, for example abbreviation mappings like "St" to "Street" or legal forms like "Pvt" to "Private"? They come only from our own knowledge, not from any external source.	https://drive.google.com/open?id=1K0kZ	1. Yes 2. Best public score 3. Total pairs. This is a separate judging criteria beyond the public/private leaderboard score. A stronger blocking method would require less computation and generat 4. Yes Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training an

			We would like to raise a concern regarding the disabling of our submission access. Before making our submissions, we carefully reviewed the Unstop challenge page, README_available rules, and all other instructions/documentation provided for the challenge. We made sure to check the available information before proceeding with our submissions. During the challenge, the platform continued to allow us to submit solutions, and we were able to make 15 submissions on the same day. More importantly, all of these submissions were successfully accepted, evaluated, and assigned leaderboard scores by the platform.		
9/26/2026 15:08:04	Junmoni Sinha	Team_IIT_KGP	The official challenge communication states that after the maximum number of submissions, "the submit button will be disabled." However, in our case, the submit button continued to remain available, and we received no warning or indication that continuing to submit would result in our submission access subsequently being disabled. We understand and respect the challenge rules. However, since we had carefully reviewed the available documentation and the platform itself continued to accept and evaluate our submissions, we kindly request that our submission history and the relevant platform logs be reviewed. We request you to please reconsider the disabling of our submission access and, if possible, reinstate our ability to submit for the remainder of the challenge. We would greatly appreciate your consideration and a fair resolution. Thankyou	https://drive.google.com/open?id=1PvAz

9/26/2026 18:10:29	mahesh	tech titans	Hi team, we're participating in the Amazon ML Challenge 2026, and I've completed around half of the implementation so far. We now need to run the full 1.73M test dataset, but Kaggle is not sufficient due to storage and memory limitations. Which platform do you suggest we use to run the remaining large-scale processing — AWS EC2, SageMaker	https://drive.google.com/open?id=1mDM	You can use AWS Sagemaker AI
9/26/2026 18:11:27	Punyak	flipkart	We would like to clarify the rules regarding knowledge distillation for our model. Scenario 1: Are we allowed to use a teacher model larger than 8B parameters (for example, a ~8B open-weight model) during the development/training phase to generate synthetic training data, reasoning traces, labels, or other supervision, and then distill this knowledge into our final ≤8B model? The final model would not contain or require the lar Scenario 2: Are we allowed to use a >8B teacher model together with external APIs and/or MCP tools during the development/distillation phase to generate the supervision/data used to train our final ≤8B model, provided that the final submitted model does not make any external API/MCP calls and does not depend on those services at inference t In both scenarios, we would not use any external proprietary dataset or externally hosted API as a source of training data, except for the API/MCP usage specifically described in Scenario 2. The larger model/tools would only be used during the distillation/development process. Could you please confirm whether Scenario 1 and Scenario 2 are permitted under the challenge rules, and whether there are any restrictions on the teacher model, generated synthetic data, APIs, or MCP tools used during distillation?	https://drive.google.com/open?id=1VuNX	No, for both the scenarios. Using any model larger than 8B parameters is prohibited even for teacher model.
9/26/2026 18:43:03	Vadde Sai Hrushikesh	Daisuke	The fair-play rules prohibit external databases, APIs, geocoding services, and internet data augmentation. We are not asking about any of those. We use none of them, and our pipeline makes no network calls. Our question is about the text files you supplied: test_source1.tsv, test_source2.tsv, and test_source3.tsv. May we compute label-free corpus statistics over those records and use them as model features? Concretely: Document frequency / IDF weights — counting how many records each name or address token occurs in, so that agreement on a rare token counts for more than agreement on a common one such as "Enterprises", "Services", "Road", or "Limited". Frequency (popularity) counts — counting how many records share a given normalized name or address, so the model can discount a name match when that name is shared by hundreds of records, such as a bank branch or franchise outlet. Both statistics would be computed only from the text fields of the files you provided. No labels are involved — we have none for the test set — and no external resource is consulted. This matters more than a usual tuning question because of the country split. France appears only in the test files: 259,452 of the 1,732,544 test Source 1 entities (15.0%) and 1,434,993 test Source 2/3 records are French, while all three training files contain zero French records. A statistic fitted on the training files therefore has no French vocabular Two readings of the rules seem possible to us: (a) Permitted — the test inputs are competition-provided data, so using their unlabeled text distribution is not external augmentation. (b) Not permitted — anything fitted must be fitted on the training files only, because a solution should be able to score records without holding the whole test corpus. Unless told otherwise, we will follow (b), the restrictive reading. Please confirm which interpretation you intend.	https://drive.google.com/open?id=1hjPu	1. It is permitted
9/26/2026 18:48:22	Manasa	Ein Zweck	Can't setup sagemaker studio. Error: ResourceLimitExceeded The account-level service limit 'Total domains' is 0 Domains, with current utilization of 0 Domains and a request delta of 1 Domains. Only 0 Domains is supported. See https://docs.aws.amazon.com/general/latest/gr/sagemaker.html#limits_sagemaker for more details.	https://drive.google.com/open?id=1FuTX	
9/26/2026 19:05:23	Suryansh Dubey	KGPDELalliance	1. Self training on unlabeled test records May we use our own model's high-confidence predictions on the test source records as extra training labels (pseudo-labelling), then retrain? No external data would be involved, only the provided test files and our own predictions. This would help us adapt to France, which appears only in the test set. 2. Pretrained open-source models Is it allowed to use publicly available pretrained weights, downloaded from Hugging Face, as part of the pipeline? Specifically intfloat/multilingual-e5-small (MIT licence, 118M parameters), both for embedding-based candidate generation and fine-tuned on the training labels as a pair classifier. We understand the final model must be MIT/Apache 2 3. Unsupervised statistics from test inputs May the pipeline compute unsupervised statistics over the test source files? For example, word rarity (IDF) weights, nearest-neighbour search over test names, and counts of how many Source-1 records share a name. No labels or external data are involved. 4. Country-dependent decision threshold The instructions say not to hard-code the country list. Would it be acceptable to use a stricter match-probability threshold for records whose country label never appeared in the training data (for example France)? The rule would be defined as "unseen in training", not by naming any country.	https://drive.google.com/open?id=1z2hJ	1. Yes 2. Yes 3. Yes 4. Yes Computing unsupervised stats (TF-IDF, token frequencies, a blocking index) on the provided test files uses no external data or labels, so it is allowed. Self-training an

9/26/2026 21:04:54	Arshita Garg	MLCodex	I want to upload my project on sagemaker to use aws for running my model but the issue is it is not taking my registered email id in the aws console	https://drive.google.com/open?id=1Dv5T	
9/26/2026 21:32:45	Avaneesh Bhadlikar	Big hero 4	Hello, We'd like to confirm what the rules allow before we use it. The rules prohibit external data lookup and state that the challenge uses "only the provided training data". We plan to use no external data of any kind, and want to check whether the following uses of the provided test files are permitted: Unsupervised statistics and preprocessing on test records: e.g. fitting TF-IDF vocabularies or word-frequency statistics on the test records, with no labels involved. Unsupervised domain adaptation: continuing the pretraining of an open-source language model (masked-language modelling) on the raw test names and addresses, with no labels or predictions used. Pseudo-labeling (semi-supervised learning): using our own model's high-confidence predictions on the test set as additional training examples, then retraining. This would still use only the provided data. Which of these are allowed? If any are allowed, we will document them fully in our methodology write-up. Thank you.	https://drive.google.com/open?id=1RQpR	All of these are allowed
9/26/2026 21:39:10	Vishnu Priya	BitterBytes	For the Business Entity Resolution challenge, the guidelines PDF allows up to 5 submissions per day over 3 days, while the portal's Key Instructions say answers cannot be changed once given. We have already made 6 leaderboard submissions on 26 Sep, and all were scored. Could you confirm: Is the daily limit counted in IST or UTC, and do today's 6 submissions affect our quota for 27 Sep? Which submission counts for the final ranking: our best-scoring one, our last one, or one we select?	https://drive.google.com/open?id=1ACXI	
9/26/2026 22:08:55	Aastha Yadav	Silver Strikers	Hi, I have a clarification regarding the final submission process for the Amazon ML Challenge 2026. During the challenge, we are required to upload matching_results.tsv to the Portal for the leaderboard. However, the guidelines also mention that every team must submit a final .zip package containing the outputs, source code, requirements.txt, and Documentation_template.md. Could you please confirm where/how the final submission ZIP should be uploaded? Is there a separate section/link in the Portal for the final submission package, or will it be collected through another platform/form? Thank you.	https://drive.google.com/open?id=1vFDVi	
9/26/2026 22:14:14	Rithvik Achutuni	!COYS!	Where do I submit code zip file, I dont see any submission for it as of (10:13 pm, 26 September)	https://drive.google.com/open?id=166oiR	
9/26/2026 22:49:14	Rishikesh	Tryout	In one of your previous responses, you mentioned: 'Keep your blocking lean, because fewer comparisons are encouraged: approaches that generate a smaller candidate set per Source 1 entity will be ranked higher in the final evaluation.' What do you consider a comparison? Comparison here can happen at two stages: first, we use comparisons to	https://drive.google.com/open?id=1JtijjvF	
9/26/2026 22:52:19	harshit sharma	Innovators	e are encountering a persistent automated grader parsing issue on the Unstop portal for our submission file matching_results.tsv. Details & Steps Followed: Our submission file matching_results.tsv is generated directly via Python Pandas using strict UTF-8 tab-separated formatting (sep='\t', lineterminator='\n'). The exact standard columns are present: ['cluster_id', 'entity_id', 'entity_name', 'source_file', 'cluster_size']. We verified and removed any potential UTF-8 BOM ('\ufeff') or hidden control characters. Despite uploading a strictly compliant tab-separated file, the portal evaluator fails instantly with the error message: unexpected header ['cluster_id', 'entity_id', 'entity_name', ...] We also tested submitting without headers, but the parser attempted to read the first data row as a header and threw a similar error. The issue appears to be an automated grader script parsing error on the backend for standard TSV headers. Please look into the evaluator validation script and help us resolve/re-evaluate this submission	https://drive.google.com/open?id=17MiYi	
9/26/2026 22:58:45	Mayank Golchha	Hagokmok	Code for top 50 position are literally sold on telgram for 10k,check on reddit	https://drive.google.com/open?id=1tn2H

9/26/2026 23:12:21	Yashraj Arvind Ghatol	Team Pheonix	AWS Services not responding	https://drive.google.com/open?id=1PbhR	
9/26/2026 23:19:02	Aman Parganiha	NaN Pointers	We have made 5 leaderboard submissions (25 Sep 05:14 PM, 06:54 PM, 10:25 PM; 26 Sep 08:22 AM, 08:23 AM IST). Since the 5th submission, the "upload file" and "Submit & Evaluate" buttons have been disabled. More than 24 hours have passed since our first submission, and the buttons are still disabled. Could you please clarify: 1. Is the submission limit 5 per day or 5 in total? If it is per day, please re-enable our uploads; we have an improved matching_results.tsv ready. 2. Which submission is used for the private leaderboard: our best one or our latest one? 3. Must the matching_results.tsv inside the final submission.zip be identical to one of our leaderboard submissions? 4. Where and by when should we submit the final zip (code + outputs + documentation)? A screenshot is attached. Thank you.	https://drive.google.com/open?id=1spkSr	
9/26/2026 23:34:01	Joshua Karthik	Debug Thugs	by mistake we had uploaded the same file twice which led to 15 submissions will the number uploads be refreshed by midnight	https://drive.google.com/open?id=1BcEzY	
9/26/2026 23:45:38	Arpan Dey	Rushfordmas	If I submit less than 5 , can I use extra submission at the next day	https://drive.google.com/open?id=1TRwA	
9/26/2026 23:47:21	Tanay Kiran Sodha	Psenti Sem	Please provide a clarification on this: 1. There is no option to submit the code and hence the candidates_pairs.tsv after the first submission (it was asked only once and those files have now changed). Is this expected? We are only able to submit matching_results.tsv from now on. 2. Will the unused submissions be carried over?	https://drive.google.com/open?id=1uBxPi	
9/26/2026 23:52:16	Krunal Baraskar	Azure	The maximum submissions per day limit on the portal was glitchy due to which I was able to submit more than 5 submissions in a single day (15 to be precise) . I thought the submission limits were waived off as the button was not being disabled and similar information was yet to be conveyed via teams . Therefore we exhausted all 15 submissio	https://drive.google.com/open?id=1vK-Z6	
9/26/2026 23:59:26	Soumyaditya Masanta	Rank1	Hello Amazon ML Challenge team, We are team Rank1 (team leader: Soumyaditya Masanta, registered email: icb2024038@iiitl.ac.in) in the Amazon ML Challenge 2026, Machine Learning Round (Business Entity Resolution). On 26th September 2026, the portal kept accepting our leaderboard uploads after we had used the 5 submissions allowed per day. We made 5 submissions today. Upload #6 onwards was accepted, with no error or warning. We did not do anything unusual, we simply used the regular upload button on the challenge page. We want to follow the rules, so we would like to report this and ask for clarification: Are the extra submissions from 26th Sept counted as 26th Sept submissions? We want to make sure they are not deducted from our quota for 27th Sept, the final day. What is the correct daily limit? If only 5 per day are allowed, please let us know if submitting more will count towards tomorrow's(27th Sept) quota. Also kindly confirm the final deadline: Is it 27th September 2026, 9:00 PM IST. Thank you for your help. Regards, Soumyaditya Masanta Team Rank1	https://drive.google.com/open?id=1Jbcqg	
9/27/2026 0:02:36	Pradyumn	Mavericks	My Submit button is greyed out , i have sent my solution one time but that submission counted it two times	https://drive.google.com/open?id=1P_C_I	
9/27/2026 0:09:12	Kommineni Yashaswini	SparseMatrix	i have submitted my result on 26 september before 12 but it shows the submission on 27 exactly at 12. i will be losing my submission evaluation and my 5 submission will become 4 . i want the team to clear this issue for me . i submitted 2 times with just 8 mins time gap yet it shows the other submission is done on 27. that is not fair .	https://drive.google.com/open?id=1bqxwh	
9/27/2026 0:10:36	Sriyansh	Enigma	We have done total 7 submissions in 2 days, so,can we consider that we have total 8 submissions available on the final day? I have attached the submission details.	https://drive.google.com/open?id=1ybqxG	
9/27/2026 0:14:16	Vedhiga V B	VAR Coders	Hello Team, I am participating in the challenge and currently have the full $100 cloud credits available in my account. However, I am facing an issue while trying to launch the required r6i.large instance. The instance appears in the instance selection/search list as r6i.large (2 vCPU, 16 GiB memory), but I am unable to get/access it for use. Since we have been provided with the $100 credits, I expected to be able to use the required instance within the available credit limit. The issue is preventing me from properly setting up the required environment and continuing my work on the challenge. I have attached a screenshot showing the r6i.large instance and its pricing information. Request: Could you please check whether r6i.large is enabled/available for our account and, if necessary, enable access or provide an alternative instance with equivalent specifications that is covered by the provided credits? Please resolve this issue as soon as possible, as it is affecting our ability to continue the challenge. Details: Available credits: $100 Required instance: r6i.large Configuration shown: 2 vCPU, 16 GiB RAM Issue: Unable to access/use the instance despite having the provided credits Impact: Unable to proceed with the required setup/work mail id- arshvarshney1502@gmail.com Thank you.	https://drive.google.com/open?id=1aG1W	
9/27/2026 0:37:31	mahathi vaka	JAM.exe	am not able to access the dataset	https://drive.google.com/open?id=1I2Rgn	
9/27/2026 0:45:06	Vedanshi Mishra	ML Paglu's	I have put my matching.tsv file currently in my leaderboard live evaluation but I am not able to find the button where I need to submit my other files mentioned in the guidelines and problem statement. Also along with it is the private leaderboard visible to the participants because I was not able to find it.	https://drive.google.com/open?id=1ekNw	
9/27/2026 1:11:49	Naveen Mishra	Neural Nexus	I am not able to redeem my Top 500 extra credit as it is telling - "AWS accounts with free plans cannot redeem credits. Upgrade to a paid plan."	https://drive.google.com/open?id=1b0fKl	
9/27/2026 1:24:31	PIYUSH KUMAR BRAHMI	PRIMOR_IA_L	Are AI coding assistants (ChatGPT, Claude) allowed for writing code in this challenge? Are pretrained models or local libraries allowed if no competition data leaves our machine? Our problem has one question. Does clicking 'Next' lock further submissions, and is our best score recorded without clicking it? The guidelines state the submit button will disable after 5 submissions per day. On 25th and 26th September, we made more than 5 submissions in a single day because the submit button remained active throughout, and every submission was accepted and evaluated normally. No warning, error message, or disabled state appeared at any point to Our submission count was visible only through a list view on the portal, and since nothing on the page actively tracked or flagged our usage against the stated limit, we lost track of the count while focused on iterating and watching our score improve with each attempt. We relied on the platform's own behavior, an active and functioning submit butt	https://drive.google.com/open?id=1oA3N	
9/27/2026 1:26:10	Priyansh Saxena	ctrlAltElite	We did nothing to bypass or circumvent any limit. We used the same official submit button throughout, and had no active indicator prompting us to stop. We understand this is a known, widely reported issue. Several other teams have reported the identical experience on this same query form. We are not asking for special treatment, only that our team not be penalized for a platform side enforcement failure, and that our submission quota for the final day (27th September) be made available to us. Current best score: 0.982095	https://drive.google.com/open?id=1PFfDs	

Timestamp	Full Name	Team Name	Please describe your query or issue	Screenshot / Supporting Document	Response from Amazon Leaders
9/27/2026 1:39:39	Deva Anand M	Astrax	Are the top 100 teams from the private leaderboard selected first based only on their matching_results.tsv / $F_w.5$ score, and is candidate_pairs.tsv then used only to evaluate those top 100 teams? Or does the quality of the candidate set itself directly affect the ranking, even if a team has a lower private-leaderboard $F_w.5$ score? Is there any combined scoring or weighting between the matching_results.tsv $F_w.5$ score and the candidate-generation metrics such as candidate-set size, recall ceiling, or reduction ratio? For example, if Team A has a higher $F_w.5$ score but a much larger candidate set, while Team B has a slightly lower $F_w.5$ score but a significantly smaller and effective candidate set, can Team B rank above Team A in the final rankings? Is there a specific formula, threshold, or ranking rule used for candidate-generation quality in the final evaluation? I would appreciate clarification on whether the final ranking is based purely on the leaderboard score, or on the leaderboard score plus candidate-generation quality and other review criteria.	https://drive.google.com/open?id=1-ArZk

9/27/2026 2:18:23	Sanhith	Neuro4	We did just a little work on our project in 48 hours and we did not submitted one time also and we lost the 100 points And we will submit total project upto end of the time Can we make our self to next round For now I am just uploading the dark image for submitting the query	https://drive.google.com/open?id=1Wxw_	
9/27/2026 2:22:34	Prince Chouhan	OptiML	I didn't saw the 15 submission limit and my limit is exahusted. can you please extend the limit. I haven't made the final submission yet	https://drive.google.com/open?id=1BJDhl	
9/27/2026 2:52:20	Raj Kumar Verma	Night Havoc	For the Amazon ML Challenge 2026, the guidelines mention a limit of 5 leaderboard submissions per day and 15 submissions in total. If a team does not make any submissions on Day 1 and Day 2, can the team make all 15 submissions on Day 3, or is the limit strictly 5 submissions per day regardless of unused submissions from previous days? Please clarify whether unused daily submissions are carried forward or expire at the end of each day.	https://drive.google.com/open?id=1zPbX	
9/27/2026 4:09:29	Anuj Das	Potato Coders	Can't Submit	https://drive.google.com/open?id=17SD-I	
9/27/2026 4:11:51	Rajeet Ash	HOLY ML	After 12 AM we did 3 uploads. Any more uploads are disabled, there should be 2 more left.	https://drive.google.com/open?id=1bFc1i	
9/27/2026 4:13:43	Soumya Jhunjhunwala	LocalModels	Can you please increase the number of submission that we can make , as it is too low	https://drive.google.com/open?id=1HQBF	
9/27/2026 4:14:45	Pankaj Deopa	F4_internal	We would like to clarify the scope of permitted approaches under the competition rules. Deep learning models and pretrained transformers — Are models such as BERT, sentence-transformers, or other pretrained neural networks permitted? Specifically, we want to understand whether using a pretrained model's weights (even without any fine-tuning on external data) would be considered "external data augmentation" under the prohibiti Semantic search and vector similarity — Are techniques such as dense vector embeddings, approximate nearest-neighbor search (e.g., FAISS, Annoy), or reranking via embedding similarity permitted, provided all embeddings are generated solely from the competition dataset itself?	https://drive.google.com/open?id=1LwLh	
9/27/2026 4:36:16	Naveen OLa	CyberDyne Systems	my aws sagemaker is not working when i search sagemaker in aws console it and click on it it tellls that your registration is not complete and when i click on that it takes me to aws console showing 100 dollar credits this keeps repeating.	https://drive.google.com/open?id=1bvJE	
9/27/2026 4:50:43	Anand B	Crashout	Issue Details: Our team has reached the 15-submission evaluation threshold, and the "Submit & Evaluate" button is currently disabled with approximately 19 hours remaining on the competition timer. Query & Request: 1. Submission Limit Reset: Does the 5-submissions-per-day quota follow a rolling reset for Day 3, or is the 15-submission cap a strict lifetime ceiling across the round? 2. Additional Slot Request: Our team has finalized training on our end-to-end model pipeline (incorporating our full cross-encoder and blocking harness). If allowable within the competition guidelines, we kindly request 1 to 2 additional submission slots to evaluate our final pipeline outputs on the portal before the round deadline. We have attached a screenshot of our submission dashboard showing the current status. Thank you for your time, support, and consideration.	https://drive.google.com/open?id=17mlyr	
9/27/2026 4:58:33	Sarthak Milind Myakal	Bias & Variance	We have a question about the Fair Play / Academic Integrity section of the problem statement, specifically the line prohibiting "any external data augmentation from internet sources." Our test set includes France, which does not appear in the training data. We're considering generating synthetic training pairs for our matcher using general knowledge of French business-name and address conventions (e.g. legal suffixes like SARL/SAS, standard address formatting) to help our model generalize to France without looking up, verify Could you clarify whether this would count as prohibited "external data augmentation," or whether the rule is specifically aimed at using external sources to look up/verify/resolve actual entities (APIs, business registries, geocoding services, etc.)? We'd rather confirm this before building on it. Thanks for your time.	https://drive.google.com/open?id=1abuS	
9/27/2026 6:28:18	Akshay Hebbar	MONOPIXO	Team MONOPIXO has an evaluated matching-results submission. Where and by when must we upload the final ZIP containing code, methodology and candidate_pairs.tsv? Which submission is used for the private leaderboard: best public score, latest, or a team-selected submission?	https://drive.google.com/open?id=1Jebw	
9/27/2026 7:51:02	Prince Maurya	GradiantForce	Hello Team, During the final inference phase on the provided test dataset (~1.7 Million entities in Source 1), our pipeline is encountering severe memory constraints leading to an Out-Of-Memory (OOM) crash on local machines (e.g., 16GB RAM). Specifically, when running Candidate Generation/Blocking using TF-IDF Vectorization and Cosine Similarity (Nearest Neighbors) across the entire test corpus, the intermediate matrix representations mathematically require massive memory allocations. Even when using small chunks/batches, the sparse dot product results in a numpy._core._excep Could you please clarify: Is there an expectation that participants should provision high-compute cloud resources (like AWS EC2 with 32GB+ RAM) to successfully run inference on the final test set? Or are we expected to strictly use Locality Sensitive Hashing (LSH) or avoid TF-IDF entirely during the test phase to prevent $O(N^2)$ memory explosions? Any guidance on hardware expectations for generating the final matching_results.tsv would be highly appreciated. Thank you, Team GradiantForce	https://drive.google.com/open?id=1QicBC	
9/27/2026 8:14:08	BALA NAGA SRI THOTA	Gradient Guild	sir in the last two days we didnt made any submissions can we do today only 5 submissions or can we do all 15 submissions today	https://drive.google.com/open?id=1z23Ci	
9/27/2026 8:31:39	Niharika Sharma	Softmax	1. What is the maximum number of submissions we can upload in a single day? 2. Where do we need to upload the ZIP file? Will there be a separate dashboard for ZIP uploads, or should we upload it in the same place where we are currently uploading files?	https://drive.google.com/open?id=1N9Eo	
9/27/2026 8:36:44	Joylin Alex	InfiniX	where we need to submit the zip file (final)	https://drive.google.com/open?id=1ZZaX	
9/27/2026 8:40:04	Madichetty Suchay Srinis	CloudForge	I have a clarification regarding the submission process for the current round. As I understand from the submission requirements, during the leaderboard phase we upload matching_results.tsv through the Portal, while the final submission package additionally contains candidate_pairs.tsv, the complete runnable code, and the methodology document. I am currently in the leaderboard/Round 1 phase, so I wanted to confirm: 1) For the current Round 1/leaderboard evaluation, is matching_results.tsv the only file that needs to be uploaded through the Portal? 2) Do we need to submit/upload candidate_pairs.tsv during this leaderboard phase, or is it only required as part of the final ZIP submission? 3) Could you please clarify what exactly is meant by the "leaderboard round" and when the final submission phase begins? 4) When is the final submission ZIP expected to be submitted, and will there be a separate submission portal/instructions for it? 5) Since candidate_pairs.tsv is now mentioned as part of the final submission and candidate generation affects the final ranking, should we be generating and retaining this file throughout Round 1 even though it is not currently uploaded to the leaderboard? I have attached screenshots of the relevant submission requirements for reference. Thank you.	https://drive.google.com/open?id=1oWgw	
9/27/2026 9:07:57	Shaik Munthaj	AlgoMinds	I am the team leader of AlgoMinds. My dataset is not opening please help me asp. It is showing cannot download	https://drive.google.com/open?id=1dhZv	
9/27/2026 9:18:24	Monishwaran K	Doomsday	Issue: The file upload button on the submission page is disabled/unresponsive, preventing me from submitting my final results. Details: I am trying to submit my final files for the Business Entity Resolution challenge. When I attempt to upload my submission, the upload button remains disabled (greyed out) and is completely unresponsive. Steps I have already tried to resolve this: I have ensured that I am trying to upload the correct file format as requested by the platform (I have tried both .tsv and .zip). I have double-checked that all other mandatory fields and checkboxes (like terms and conditions) on the form are filled out. I have hard-refreshed the page, cleared my browser cache, and tried submitting from a different web browser. I have verified that the submission deadline has not passed. Could you please look into this bug or provide an alternative method for me to submit my files so I do not miss the deadline? Thank you!	https://drive.google.com/open?id=1fDGH	
9/27/2026 9:26:58	Shreya Mishra	birds-of-prey	We wanted to know how many submissions can we exactly make? Is is 5 submissions per day or a total of 15 we can make since we were able to make 7 submissions yesterday	https://drive.google.com/open?id=1SNKF	
9/27/2026 9:34:40	Kanegulla Venkatesh	Ultron	I have requested the SageMaker , but it is taking a lot of time. I have using my friend's AWS for the hackathon. Please look on to this issue as soon as possible.	https://drive.google.com/open?id=1cFSpa

9/27/2026 9:56:40	Nagandla Sri Ram	autograd	We have made submissions yesterday, it wasn't capped at 5 per day somehow so we made more submissions. Today we are unable to make any submissions. We were unaware of 5 submissions / day. But since today we didn't make any submission, but still it shows disabled can you please help / enable the submit button.	https://drive.google.com/open?id=1QN10	
9/27/2026 10:05:50	Kallagunta Yasaswini	NovaMind	Urgent — Final Submission Upload Link Required Team Name: NovaMind We have successfully submitted matching_results.tsv and received our leaderboard score. However, we cannot find the upload option for the required 1–2 page approach document and source-code ZIP. We checked the Stage 2 Code/assessment page, My Team/Team Status, Result page and Unstop challenge page. Please provide the exact uploa	https://drive.google.com/open?id=1opPq	
9/27/2026 10:07:07	Divyashree s	VectorMind	i'm not able to upload the file for submission	https://drive.google.com/open?id=1Qiaed	
9/27/2026 10:22:22	Priyanshu Narayan	DVMbois	I read in the response sheet that we have 5 submissions per day, on 27th we have made only 2 submissions, Hence 3 submissions remain, please help us out, we are not allowed to upload. We have written to unstop but they haven't replied us yet.	https://drive.google.com/open?id=1AyKSi	
9/27/2026 10:41:55	Anurag Mishra	Raptors	Hello Unstop Support, I am raising this query again regarding the missing final ZIP submission link for Amazon ML Challenge 2026. Our team, Raptors, has already submitted `matching_results.tsv` through the leaderboard portal, and it was evaluated. However, the challenge instructions also require a final ZIP containing `matching_results.tsv`, `candidate_pairs.tsv`, runnable source code, README, requirements, and the completed methodology document. The Unstop challenge page shows only the TSV upload option. There is no separate link or field to upload the final ZIP. I have already raised this issue through the contact form, but I have not received instructions on where to submit the ZIP. Please urgently confirm the correct submission method and provide the ZIP upload link, or let us know if there is an alternative way to submit it. We have prepared the final ZIP and want to ensure our team's submission is complete. Team Name: Raptors Team Leader: Anurag Mishra Thank you	https://drive.google.com/open?id=1KZYR	
9/27/2026 11:00:19	Atharva Jain	autograd	Yesterday, we made approximately 13 submissions, after which the "Upload File" button became disabled. We later read that a team is allowed a maximum of 5 submissions per day, so we assumed the limit would reset after 24 hours and waited for the next day. However, today, being the last day of the submission period, the "Upload File" button is still disabled. We have trained a significantly improved model that performs better on our validation results, and we would really appreciate it if you could re-enable the upload option for our team so that we can submit our final model. It would be extremely helpful if you could look into this and enable submissions for us. Thank you!	https://drive.google.com/open?id=1QyAJ
